

## Frequently Asked Questions

Below are responses to some of the questions most commonly answered by our Lexis Back Office Technical Support Department. Categories are:

- Moving Lexis Back Office time billing and legal accounting software from one computer to another
- Installing Lexis Back Office Powered by PCLaw
- Using Lexis Back Office Powered by PCLaw
- Data Entry Features
- Firm Procedures
- Correcting Entries
- Billing
- Taxes
- Interest
- Reports and Retrieving Information
- Bank Reconciliation
- Calendar
- Payroll
- For Former TimeSlips® Users
- Other Issues
- Troubleshooting
- Other Computers and Devices

### How do I move PCLaw / PCLawPro / LegalPro / SoloPro to another computer?

The following instructions are for the use of hardware technicians who need to move PCLaw or LegalPRO/SoloPRO software from one standalone computer to another or to move software from one network server to another.

[How do I move PCLaw \(Windows\) Versions 8.20 and up?](#)

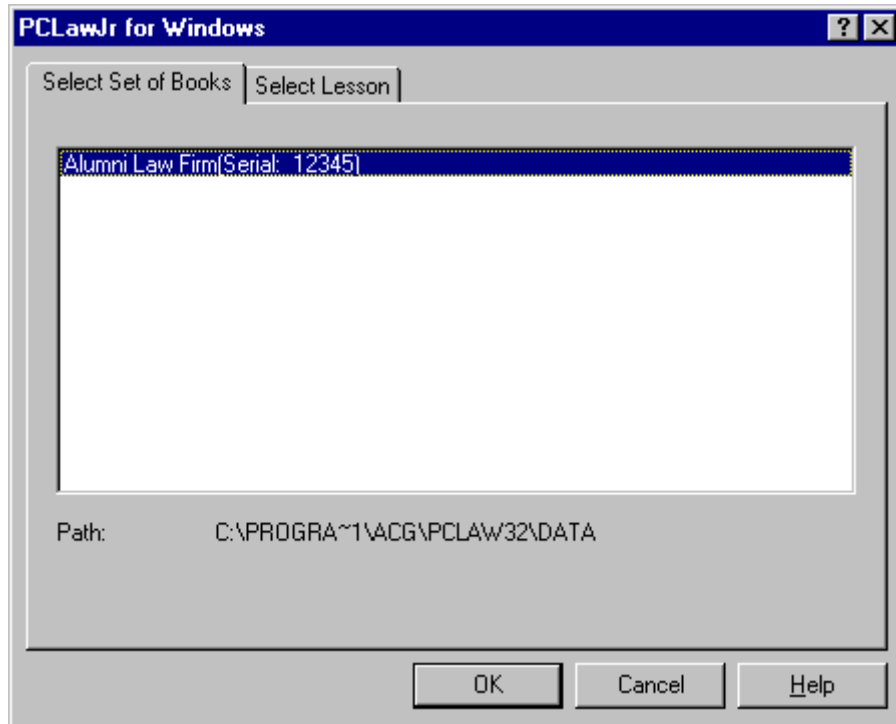

### How do I move PCLaw (Windows) Versions 3.xx – 7.xx

Perform the following steps to move PCLaw from one computer to another. Since both the programs and data are moved, *no CD* is required.

1. Determine the location of your PCLaw DATA and COMMON files.

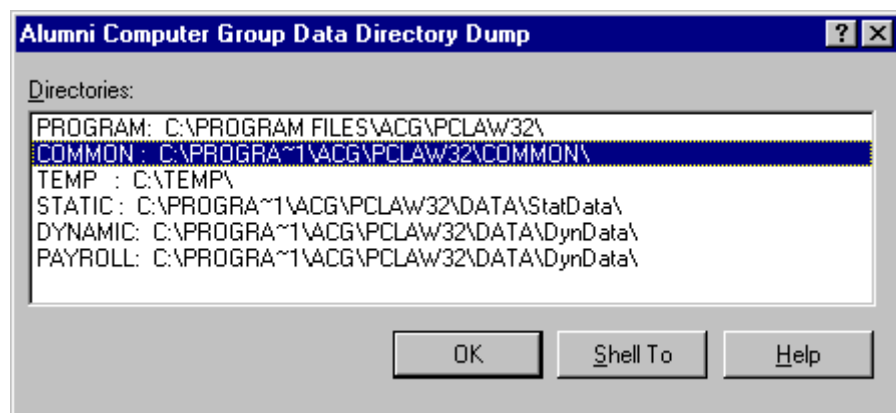

To determine the location of your PCLaw DATA files:

- Start PCLaw.
- On the **Select Set of Books** window, highlight your firm name.
- The location of your data files is listed at the bottom of the window to the right of the word **PATH**.

To determine the location of your PCLaw COMMON files:

- Start PCLaw.
- Click the **Help** pull-down menu.
- Click **About PCLaw**.
- Hold down the **Ctrl** key and the **Shift** key on your keyboard while you click **Tech Support**.
- On the **Alumni Computer Group Data Directory Dump** window, the location of your common files is listed to the right of the word **COMMON**.

2. Make sure no one is running PCLaw.
3. Copy the DATA and COMMON directories and their contents, including all subdirectories, from the old computer to the new computer (or backup these directories and restore them to the new computer).

**Technical Note:** It is important that the DATA and COMMON subdirectories are on the same directory level for the setup program to automatically detect the PCLaw data.

4. Run the SETUP program on the new computer:
  - Click **Start**.
  - Click **Run**.
  - In the **Open** box, type ***pclawpath*\COMMON\INSTALL\SETUP**
  - (where ***pclawpath*** represents the location of the COMMON directory on the new computer)
  - Click **OK**.
  - Follow the instructions of the Setup Wizard.

**Networking Note:** To connect a new workstation to a new dedicated server, follow the instructions for a Workstation Installation in the *PCLaw for Windows User Guide*. If the existing workstations are not being changed, they will automatically run PCLaw on the new server as long as the same drive letter is used to map to the new server as was used to map to the old server.

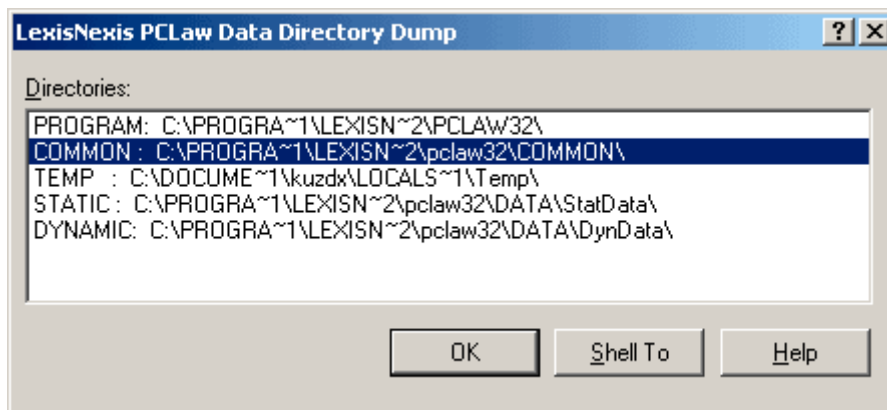

**CAUTION:** Do not remove your original PCLaw until you have verified that the program is working correctly with current data on the new computer.

## Installing PCLaw

### How do I install PCLaw on additional workstations?

First, determine the location of the Shared Components of PCLaw:

1. On the **Help** pull-down menu, click About **PCLaw(Pro)**.
2. While holding down the **Ctrl** and **Shift** keys, click **Tech Support**. The following window appears:

3. Write down the path listed beside the word **COMMON**.
4. Click **OK**.
5. Click **Close**.

Next, install PCLaw on the workstation. The workstation must have full access rights to the computer where the Shared Components reside. The PCLaw CD is not required.

### On the workstation:

1. Click **Start**.
2. Click **Run**.
3. In the Open box, type the location of the PCLaw Shared Components as determined in Step 3 above.
4. Append the path with: **\INSTALL\SETUP**.
5. Click OK.
6. On the Welcome window, click **Accept** if you accept the Software License Agreement.
7. On the PCLaw Installation window, select **Attach to a PCLaw system already installed**.
8. Click **Next**.
9. Follow the instructions of the Installation Wizard.
- 10.
11. For more information, see "Installing on Subsequent Workstations" in the PCLaw User Guide.

### **What are the minimum hardware and software requirements for PCLaw?**

#### **Why is PCLaw slow now that I've upgraded to a newer version?**

Many times when a firm updates PCLaw, they also update their computer systems. This may result in a change in the antivirus settings.

Compare your antivirus settings to the settings recommended at [www.pclaw.com/networking/basic/#3](http://www.pclaw.com/networking/basic/#3). Your computer administrator may want to change the settings.

#### **Using PCLaw**

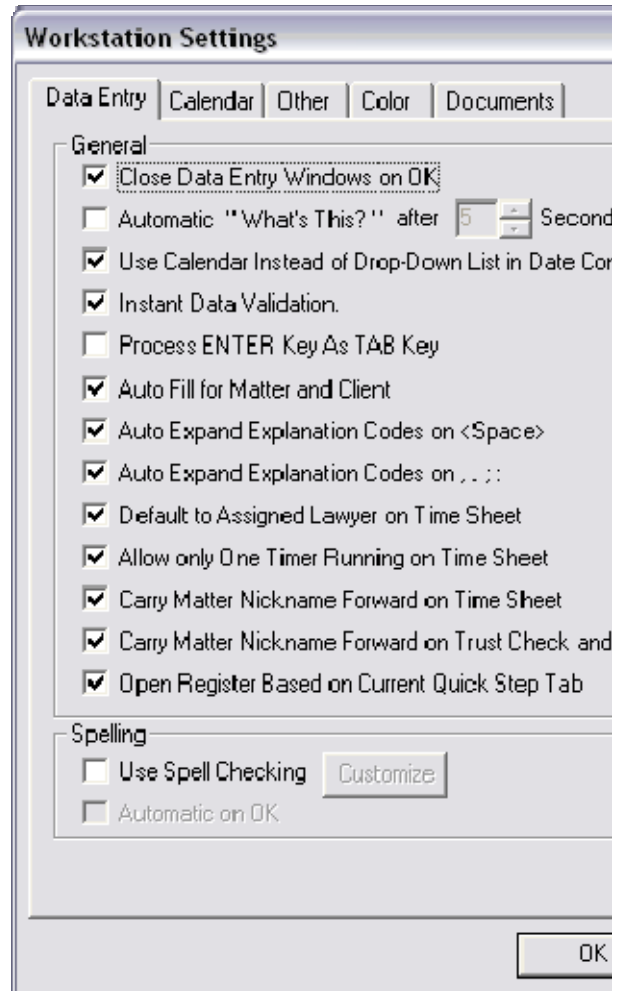

PCLaw automatically expands explanation code 14 into the associated text Review of (see Options > Explanation Codes) when you press the spacebar.

You can disable the auto expansion of explanation codes in Workstation Settings:

- 1** On the **Options** pull-down menu, click **Workstation Settings**.
- 2** Click the **Data Entry** tab. The window on the right hand side appears:
- 3** Clear **Auto Expand Explanation Codes on <Space>**.
- 4** Click **OK**.

If you also experience "auto expansion" when typing explanation codes followed by punctuation marks (for example, when typing Mr.), clear **Auto Expand Explanation Codes on , . ; : .** With both controls cleared, explanation codes only expand when holding down the Shift key while pressing the Spacebar.

These are workstation settings and only affect the workstation on which they are made.

To use PCLaw for only time and billing, follow these rules:

- If a default G/L account appears when entering transactions, accept it.
- If a G/L account is required when entering transactions, use 5000 (Expenses with the Simplified set of G/L accounts).

You don't have to print financial statements, close the month or reconcile the bank. Just ignore these features.

In PCLaw, point to the **Help** pull-down menu and click **About PCLaw (or About LexisNexis PCLaw)** . This window shows the version number at the top.

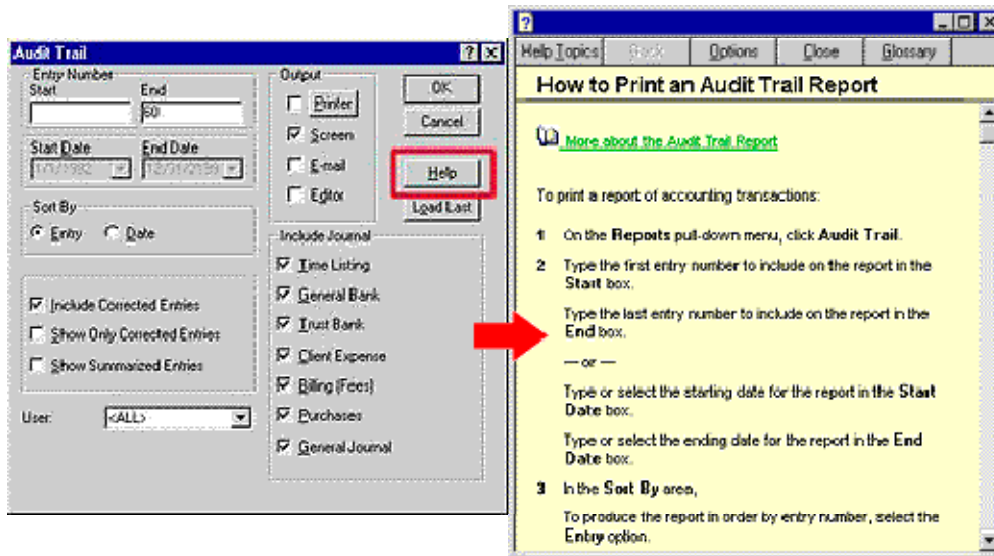

When you start PCLaw, your set of books is displayed with the location of the data files listed in the Path column. Backup this folder and all the folders inside it.

Explanation codes are abbreviations or short forms of commonly-used phrases that describe such things as work

performed, costs, payees, etc. They are used to easily recall the phrase when entering data. They are also used to store Activity Codes for task-based billing.

Task codes are used to classify time and fee entries so you can produce reports sorted by task code or restricted to a particular task code. Task codes also contain the codes required for task-based billing.

Step-by-step instructions are found in the Help files of PCLaw. When you are looking at any window, simply click the Help button to see the instructions for that window.

On any window, click the Help button for step-by-step instructions.

To create an icon, you must first have PCLaw installed on your workstation. Then follow these instructions:

1. On your Windows desktop, right-mouse click on the **Start** button.
2. On the menu that appears, click **Explore**.
3. Double-click on the **Programs** folder.
4. Double-click on the **PCLaw (32 Bit)** folder.
5. Click once on the **PCLaw** icon to highlight it.
6. Right-mouse click on the **PCLaw** icon.
7. On the menu that appears, click **Copy**. This copies the PCLaw icon into memory.
8. Close the Exploring/Explorer window by clicking the **X** in the upper-right corner.
9. Point anywhere on the Windows desktop and right-mouse click.
10. On the menu that appears, click **Paste**. This pastes the PCLaw icon on to your desktop.

Once you have created the PCLaw icon, you can start PCLaw by double-clicking on the icon.

You can access any of the PCLaw pull-down menus using the **Alt** key in combination with the underlined letter in the name of the menu.

For example, to access the Billing menu, press the **Alt** key and then press **B** (B is the underlined letter on the Billing pull-down menu).

**To exit from a pull-down menu, press Esc.**

Once you are looking at a pull-down menu, you can access any of the functions on that menu by pressing the underlined letter on the menu option.

For example, once you are looking at the Billing pull-down menu, you can access the Recreate Bill function by pressing **R** (R is the underlined letter in the Recreate Bill menu option).

Some PCLaw functions can also be accessed using the combination keys on the right hand side.

To use a combination key, hold down the **Ctrl** key while you press the letter indicated. For example, to access the Create Bill function, hold down the **Ctrl** key while you press **B**.

To move from field to field in a PCLaw window, use the **Tab** key. (If you selected **Process ENTER Key as Tab Key** on the Workstation tab of System Settings, use the **Enter** key to move from field to field.)

To use a PCLaw button, such as the Cancel button, highlight the button by tabbing to it and press **Enter**.

#### **Combination**

<b>Keys</b>	<b>PCLaw</b>

PCLaw requires a minimum screen resolution of 800 x 600 pixels. If your resolution is set lower you will not be able to see all the elements of a window on your screen.

To find instructions for changing your screen resolution, search for "screen resolution" in your Microsoft help files.

This symbol, which represents Pop Up Help, appears whenever the mouse pointer is held over a box where a list of possible entries is available.

For example, when the mouse pointer is held over a Matter box, the Pop Up Help symbol indicates you can access a list of matters in the box.

Yes. If you right-click on an empty area of the Quick Step menu and choose Customize, you can select different colors. You can also use your own digital picture for a background or choose from the schemes provided.

Yes. Right-click on an empty area of the Quick Step menu and click Show Help Panel.

Right-click in a blank area on the Quick Step menu and click Show Tool Tip.

## Data Entry Features

Please change your monitor resolution to 800 x 600 or higher. If you do not know how to do this, please contact your computer technician.

When you start PCLaw, it reads your computer's system date and uses that date by default.

When you enter your password, you have the option of overriding the PCLaw date. If the date that appears on data entry windows is not today's date, your computer system does not have the correct date or the date is being overridden when PCLaw is started.

Firm Name	Path
<EXPERIMENTAL BOOKS>	C:\CORONA7\PLAYSYS
Alumni Law Firm (Serial: 12345)	C:\PROGRAM*1\ACG\PCLaw32\data

User Name: ADMIN

Password:

Default Entry Date: 5/14/2004

OK Cancel

If you are using the Simplified Set of G/L Accounts, use the Client Recovery account.

If you are using the Extended Set of G/L Accounts:

- Use the Expense account (for example, Photocopy Expense) to see the net result of expenses minus recoveries on the Income Statement.
- Use the Recovery account (for example, Photocopy Recovery) to see the total firm expense and the total firm recoveries separately on the Income Statement.

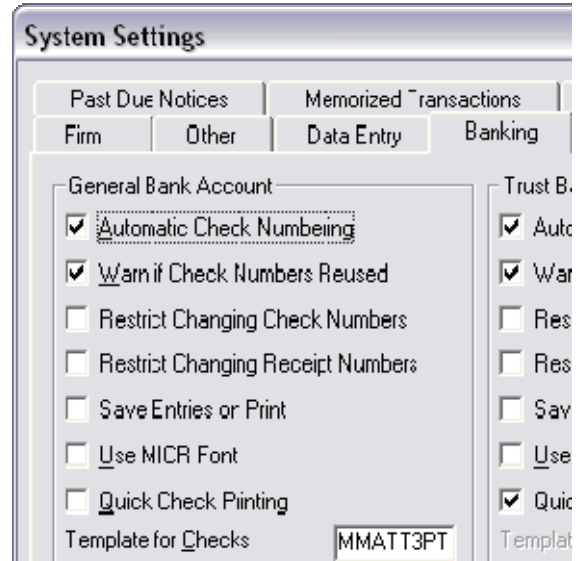

For more information, see the Frequently Asked Questions chapter of the PCLaw for Windows User Guide.

The fonts used in quick check printing are the default fonts from your Windows operating system and cannot be changed from within PCLaw. Some printers allow you to change the font directly on the printer itself.

You can, however, use alternate fonts if you de-select **Quick Check Printing** and use a check template on the **Banking** tab of **Options - System Settings**. You can change the font by modifying the check template in **Tools - Template Editor**. After modifying the template, test the changes by printing a check on blank paper and holding

the paper over a blank check.

Deselect Quick Check Printing and select a Template for Checks.

If you want the Income Statement and Balance Sheet to reflect the whole year, then use the G/L Opening Balances function to enter the year-to-date trial balance figures from your former accounting system. However, be aware that the Income Statement for the first month will include year-to-date figures.

This means you are using a "reserved" G/L account. Reserved accounts are control accounts for PCLaw journals (from the Reports - Journals pull-down menu). If you make an entry directly to a reserved account, the corresponding journal will no longer balance with the account on the trial balance.

For example, Genbank1 (1000 General Bank Account 1) holds the balance of the bank from the General Bank Journal. It increases when a receipt is entered and decreases when a check is issued. If a general journal entry is made directly to this account, the Trial Balance will reflect the change to the account, but the General Bank Journal will not. Therefore, in most cases, it is not a good idea to post directly to reserved accounts.

If it is necessary to adjust the balance in the general bank account, you should enter either a receipt or a check to affect both the journal (General Bank Journal) and the control account Genbank1 (1000 General Bank Account 1).

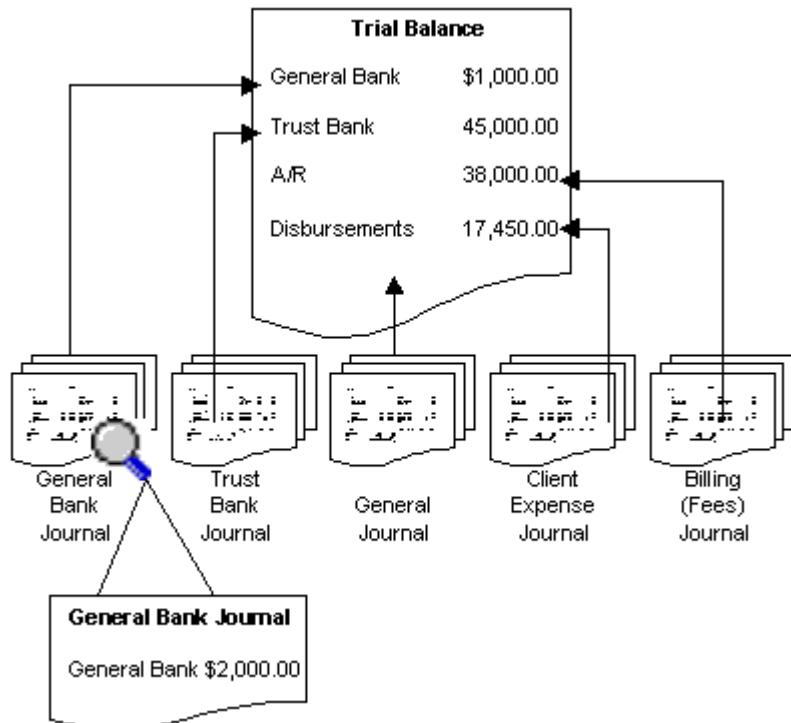

**Follow this rule:** If a reserved G/L account appears automatically, then use it. If you are warned against using an account, do not use it.

### Example

In the illustration shown, the following general journal entry was made directly to the General Bank:

Since general journal entries, which are recorded in the General Journal, affect the Trial Balance directly, they have no effect on the other journals.

In this example, the bank balance on the Trial Balance was reduced but the balance on the General Bank Journal was not. The Trial Balance no longer matches the General Bank Journal.

The correct way to handle this transaction is to issue a General Check and allocate the check to the Mortgage Payable and Mortgage Interest accounts.

Account	Debit	Credit
Mortgage Payable	\$850.00	
Mortgage Interest	\$150.00	
General Bank		\$1000.00

The answer to this question is "either one". Both accounts are expense accounts and reduce the firm's net profit. The difference lies in how you want to see the expense information on your Income Statement.

Assume that you have already purchased photocopy paper and toner with a check for \$90. The check was entered and posted to 5520 — Photocopy Expense.

### Scenario 1: Using account 5520 — Photocopy Expense

When you make an expense recovery entry for \$3.00 to 5520 — Photocopy Expense, PCLaw debits either 1210 — Client Disbursement Recoverable (Accrual and Modified Cash methods of accounting) or 5010 — Client Disbursement Expense (Cash method of accounting). It credits the account that you specify, in this case, 5520 — Photocopy Expense. Your Income Statement reflects part of the transaction like this:

Photocopy Expense consists of a debit of \$90.00 from the initial purchase of photocopy supplies and a credit of \$3.00 from the expense recovery entry.

Expenses

5520 Photocopy Expense	87.00
5521 Photocopy Recovery	0.00

Total Expenses 87.00

**Scenario 2: Using account 5521 — Photocopy Recovery**

When you make the expense recovery entry for \$3.00 to 5521 — Photocopy Recovery, PCLaw debits either 1210 — Client Disbursement Recoverable (Accrual and Modified Cash methods of accounting) or 5010 — Client Disbursement Expense (Cash method of accounting). It credits the account that you specify, 5521 — Photocopy Recovery. Your Income Statement reflects part of the transaction like this:

Photocopy Expense consists of a debit of \$90.00 from the initial purchase of photocopy supplies and Photocopy Recovery consists of a credit of \$3.00 from the expense recovery entry. Expenses

5520 Photocopy Expense	90.00
5521 Photocopy Recovery	-3.00
Total Expenses	87.00

Notice that the only difference between these two scenarios is that in scenario 2 you can see the total photocopy expense before recoveries in one account and the total photocopy recoveries in the other account.

It makes no difference which method you use because the total expenses (and therefore, the net income) are the same in each situation.

**For more information** about expense recoveries and accounting, see Processing Client Expenses on page 201 of your user manual.

When the check was produced, a matter nickname was specified. This added the charge to the client ledger for subsequent billing. When the expense recovery entry was made, the charge was also added to the client ledger.

It is not necessary, when issuing a check with a matter nickname, to make an expense recovery entry. Specifying a matter nickname on the general check window makes the expense recovery entry occur automatically.

To apply advanced costs to a client's account, use one of the following methods:

**Method 1:**

1. Issue a general check with the General Check function, specifying a matter nickname.

**Method 2:**

1. Issue a general check with the General Check function, without a matter nickname.
2. Record the advanced cost with the Expense Recovery function, specifying a matter nickname.

Both methods are acceptable because they result in a check being issued and a charge being added to the Client Ledger.

G/L account 5210 is the Client Disbursement Clearing account which is used automatically whenever a matter nickname is specified on a general check.

When the check is saved, two debit/credit transactions are made:

1. For the general check portion of the transaction, PCLaw:

Debits the account specified

Credits the general bank account

2. For the expense recovery portion of the check, PCLaw:

Debits 1210 Client Disbursement Recoverable (accrual/modified cash)

Debits 5010 Client Disbursement Expense (cash)

Credits the account specified

Notice how the net effect on the account specified, in this case 5210 — Client Disbursement Clearing, is zero. Even if you use a different G/L account, the net effect will still be zero. The reason we use 5210 is to keep all the clearing transactions in one account.

In general, you can follow these rules:

- If Client Disbursement Clearing (5210) is used by default, you should accept that G/L account nickname.
- If Client Disbursement Clearing (5210) is not used by default, you should not specify this account.

**The Client Disbursement Clearing account** is defined on the General tab of System Settings. If you use G/L account 5210 for some other purpose, you should change the default account on this screen.

There are two ways to change the PCLaw check layout, depending on which layout type you are using. To determine which layout type you are using:

1. On the **Options** menu, select **System Settings**.
2. Click the **Banking** tab.
3. In the **General Bank Account** area, look at the **Quick Check Printing** box.
4. If **Quick Check Printing** is selected, you are using the Quick Check Layout and can modify the layout by clicking the **Quick Check Layout** button on this screen.

— or —

If **Quick Check Printing** is not selected, you are using a template. To determine the name of the check template you are using, look in the **Template for Checks** box. You can modify the template using the **Template Editor** function from the **Tools** menu.

For more information about the template editor, see "Template Editor" on page 317 of your user manual.

This function is equivalent to issuing a trust check and then entering a general retainer, a receive payment, or

both. You use this function to perform these functions in one step.

Use the Trust-to-General Transfer function in the following situations:

- You have just created a bill and want to transfer trust funds to your general account to pay off the bill.
- You are about to create a bill and you want a transfer of trust funds to the general account to appear on the bill.
- You want to transfer trust funds to the general account to pay off an Accounts Receivable balance.
- The last retainer the client gave you has been used up and you need more funds for the general account.

**Warning:** Consult your local bar association or law society to determine the regulations you must follow regarding trust funds and general retainers.

For more information about Trust-to-General Transfers, see "Trust-to-General Transfer" on page 214 of your user manual.

The Receive Payment function should be used if the payment from a client should be applied to an invoice that has already been created. The General Retainer function should be used if the payment should be applied to items that will be billed in the future.

In general, determine if the items for which you want to pay have been billed. If they have, use the Receive Payment function. If they have not, use the General Retainer function.

**Example 1:**

You discuss a case with a client and agree to take on the case. The client gives you a check for \$500 toward the work you will do. Since no bills have been created for this client, you should use the General Retainer function to receive the funds. When you eventually bill the client, the \$500 general retainer will be automatically applied to the bill to reduce the amount owing.

**Example 2:**

You have worked on a case for a client and have entered time and expense recovery entries. A bill is created and mailed to the client. A week later, you receive a check for \$650.00, the total amount of the bill. In this scenario, the items being paid have already been billed; therefore, the funds should be entered with the Receive Payment function.

**If the amount entered with the Receive Payment function** exceeds the amount owing on a bill, the excess amount will be treated as a general retainer.

For more information about the Receive Payment function, refer to "Receiving a Payment From a Client" on page 254 and "Exercise 8: Processing a payment from a client" on page 120. Pages 91 and 258 contain more information about General Retainers.

If a check you received did not clear the bank, use the following procedure to correct the problem:

1. Reverse the original receipt by running the appropriate function again, type the original amount with a minus sign (-) in front.
2. For a **Receive Payment** transaction only, select **Pay Invoices Manually**. (If you do not, the system deducts the amount beginning with the first billed invoice. This may not be the invoice you are trying to correct.)
3. You may also have to record a bank service charge. Enter a **General Check** transaction for the amount of the charge, specifying a check number of DM, and allocating it to the matter. (If you are doing so before receiving your bank statement, remember not to include the charge again when you reconcile your bank accounts.)

**Important:** You must use the same function that was used for the transaction. In other words, a **Receive Payment** cannot be corrected using a **General Retainer** or a **Firm Receipt**. If you attempt to do so, the amount will not be deducted from your accounts receivable and the bill will still show as having been paid.

**Note:** To correct a receipt using the original date, that date must be in a month that is not yet closed. If it is closed, reverse the receipt and enter the bank charges using a date in the current month.

If you receive a payment from a client that is higher than the amount owing, PCLaw handles it automatically. Use the **Receive Payment** function to enter the full amount of the receipt.

PCLaw records the amount that is applied towards Accounts Receivable as a **Receive Payment**. When it detects that there is still an amount being received for which there is no Accounts Receivable to apply it, PCLaw records the overpayment as a **General Retainer**.

If you leave the general retainer on the client's account, the overpayment will be applied to the next bill that is created for this matter.

**Some jurisdictions do not allow General Retainers.** To refund the overpayment to the client, follow these steps:

1. Write a refund check to the client using the **General Check** function. This transaction appears as an unbilled disbursement on the Client Ledger.

At this point, the Client Ledger shows an unbilled disbursement and a general retainer of the same amount.

Create a bill using the **Create Bill** function to cancel out the General Retainer with the Unbilled

Disbursement.

Use the **Receive Payment** function on the **Data Entry - General** pull-down menu.

1. Type the client's name in the **From** box.
2. Type the check amount in the **Amount** box.
3. Type an explanation in the **Explanation** box.

In the allocation area,

4. Leave the **Matter** box empty.
5. Type or select the client nickname in the **Client** box.
6. Leave the **Invoice** box empty.
7. Type the amount of the check in the **Amount** box.
8. To control which invoices are paid, select **Pay Invoices Manually**.
9. Click **OK**.

The Payment Allocation window appears, listing all invoices for the client, regardless of the matter.

10. Type the payment and/or interest amount beside each invoice you wish to pay.
11. When the total allocated equals the check amount, click **OK**.

The General Bank Journal will show a receipt applied to multiple matters.

There are two steps to this procedure:

1. Use the General Retainer feature with a negative amount to remove the general retainer.

Use the Receive Payment feature with a positive amount to pay the outstanding invoice.

A trust receipt is physically deposited into the trust bank account. General retainers are physically deposited into the operating account.

**Warning:** In many jurisdictions, funds advanced to you must be deposited directly into the trust bank account.

## **Firm Procedures**

**I need to write a check to pay for a credit card bill. The bill contains charges for meals, gasoline and a dinner with a prospective client. How do I enter the check for this bill?**

Use the **General Check** function from the **Data Entry - General** menu:

1. Enter the name of the credit card company in the **To** box.
2. Enter the date of the check in the **Date** box.
3. Enter the full amount of the check in the **Amount** box.
4. Canadian users should enter the total amount of GST from the bill in the **GST** box.
5. Enter the appropriate text in the **Explanation** box.

In the **Allocation** area:

1. On the first line, enter the meal amount and use G/L Account 5330 — Meals.
2. On the second line, enter the gasoline amount and use G/L account 5050 — Auto Expense.
3. On the third line, enter the dinner amount and use G/L account 5250 — Entertainment.

The total of the allocations must equal the amount entered in the check area of the screen (minus GST, if applicable).

If there are personal charges on the credit card statement, enter the amount in the **Allocation** area and use a G/L account such as Drawings (for partners) or Employee Loans (for employees).

If you are running PCLawPro or have the Accounts Payable optional module, you can enter each charge from your statement as a separate A/P invoice, and then pay all the invoices with the Process Payables function.

## **Correcting Entries**

To correct a general check, use the Correct Check function from the Data Entry - General menu. To select which check to edit:

1. Leave the **Matter** box empty.
2. Leave the **Entry #** box empty.
3. Type the check number in the **Che #** box.
4. Type or select the date of the check in the **Start Date** box.
5. Type or select the date of the check in the **End Date** box.
6. Click **OK**. The check is displayed on the screen.
7. Make any necessary corrections.
8. To save your corrections, click **Next**.

If you receive a message that the entry cannot be found, read the next section. It describes the conditions that prevent a transaction from being changed.

**You can also correct a check** with the Working With - General Bank function from the Data Entry menu.

When you correct a transaction using the Working With - Client Ledger function (or any other Working With function), it is the same as using any of the "correct" functions (such as Correct Check, Correct Receipt, etc.). Whether or not you can change a transaction, and whether or not the **Change** button is grayed out, depends on the condition of the transaction. In many cases, you can only change an entry if:

- it has not been billed
- it is in a month which has not been closed
- it is not part of a transaction where part of the entry has been billed
- it is in a month where the bank has not been reconciled (if you are using PCLawPro or have the Bank Reconciliation optional module).

If the **Change** button is grayed out or you receive a message that you cannot change the entry, it means that the entry does not meet the conditions for editing.

This message indicates that the month in which the check was originally written has been closed. You can only change PCLaw entries from open months because in closed months, all the transactions have been posted permanently to the General Ledger.

There are two ways to correct a transaction from a closed month:

**Method 1:**

1. Re-open the month using the Reopen Month function from the G/L menu and then make the correction. Be sure to get your bookkeeper's permission before re-opening a month.

**Method 2:**

1. Enter the incorrect transaction in the current month with a negative amount. This reverses the original entry.

Re-enter the transaction in the current month with the correct information.

PCLaw will not recognize that you have re-opened the month until you exit and restart PCLaw. Once you restart PCLaw, you will be able to correct the entry.

## **Billing**

There are two methods you can use to show a discount on a bill:

When creating a bill, make sure that **Prompt for Changes to Billed Amounts** is selected on the **Options** tab. When PCLaw displays the total charges for the bill, reduce the total fees. When you click **OK** to produce the bill, PCLaw prompts you for an explanation of the fee change. Type the appropriate explanation for the reduction in fees and it will appear on the bill.

OR

Use the **Fee Sheet** function from the **Data Entry - Fee Sheet** menu to enter a flat fee with a negative amount and an appropriate explanation such as "Courtesy Discount". When you bill the client, the total amount owing is reduced by the negative fee entry.

Using the Template Editor from the Tools menu, add the token Balance General Retainer (represented as Bal Rtnrs on the template) to the bill. Use a text box to the left of the token to add your own descriptive text.

### Using the Edit Invoice Disk Image Function

You can edit pre-bills, bills and recreated bills by using the Editor output option in conjunction with the Edit Invoice Disk Image function.

To use this feature:

- word processing software must be installed on your workstation
- the word processor must have the ability to read RTF (rich text format) files

Two steps must be followed to edit invoice images:

1. Create a pre-bill or bill, or recreate a bill, selecting the **Editor** output option.
2. Use the **Edit Invoice Disk Image** function from the **Billing** menu to load the bill as a document in your word processor.

### Using the Editor Output Option

On the **Main** tab of the **Create Pre-Bill**, **Create Bill** or **Recreate Bill** function, select the **Editor** option in the Output area.

This option saves the invoice as a file in rich text format.

To edit invoice images, you must first use the Editor output option:

#### Filenames

The filename assigned to a pre-bill is SAMPLE.RTF; however, you can save the bill with a different name by filling in the Disk File box. For example, if you type PREBILL in the Disk File box, the pre-bill is saved in the file PREBILL.RTF. Do not type .RTF in the box. It is automatically appended to the filename.

Bills and recreated bills use a filename consisting of the invoice number with the .RTF file extension. For example, if you create or recreate invoice number 8331, the bill is saved in the file 8331.RTF.

## Location of Files

Invoice images are saved on the hard drive where your PCLaw data is stored — on drive C of stand-alone systems or on the server of network systems. On a standard PCLaw installation, where the default directories were accepted, the bills are located in:

C:\Program Files\ACG\PCLAW32\DATA\DYNDATA

With a custom installation, where a different path was specified for the data, the bills are saved in:

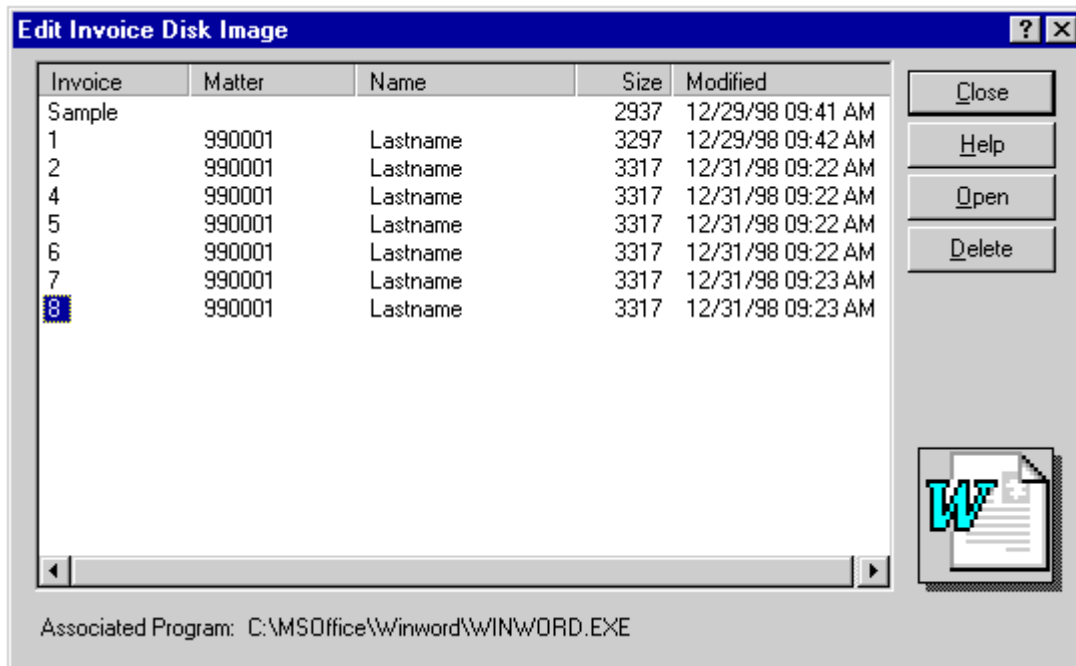

C:\...\DYNDATA

where ... represents the location chosen for the data files. On a network system, replace C with the drive letter of the computer where your PCLaw data files are stored.

## Loading the Invoice Image

Once you have created a pre-bill or bill, or recreated a bill, using the Editor output option, you can load the image of the bill into your word processor.

On the **Billing** menu, select **Edit Invoice Disk Image**. You see a list of invoices that have been saved with the Editor option.

Select the invoice you wish to edit and click **Open**. PCLaw starts up your word processing software and loads the selected invoice.

Once the invoice is loaded, you can modify, print and/or save the invoice as you would with any other word processing document. Any changes made to amounts are not reflected in the PCLaw data files. Use the **Change Bill** function from the **Billing** menu to change the billed amounts on the Client Ledger and the Billing (Fees) Journal.

**If your word processor does not start up**, see 375 of the user manual.

### **System Settings that Affect the Editor**

PCLaw is initially set up to save 20 invoice images on your hard drive, which means that when you save the 21st invoice image, the first one is deleted. You can change the maximum number of invoice images that are stored by using the History setting on the General tab of System Settings.

When you are mass billing, you should increase this setting to a number higher than the number of bills that will be created. For example, if between 150 and 200 bills are created when you mass bill, you should increase the History setting to at least 200. This ensures that invoice images are saved for all the bills.

**The maximum number of invoice images** you can save depends entirely on the amount of hard drive space available on the computer where your PCLaw data files are stored.

### **System Settings and the Appearance of Bills**

The appearance of bills in RTF files is controlled by the template used when creating the bill. By default, pre-bills use the SDETAIL template and bills/recreated bills use the template called DETAIL.

You can change which template is used for pre-bills on the Matter tab of System Settings. The bill template is changed on the Billing/Past Due/Taxes tab of the Open Matter window.

**For more information about editing bills**, see page 243, or click **Help** in the Edit Invoice Disk Image window.

The contents of your invoice are displayed in tables and cells. Consult your word processing documentation for information about manipulating tables and cells.

If your word processing software does not automatically start up when you click **Open**, you need to associate your word processor with RTF files. Follow these steps only once on any workstation where the invoice does not load.

1. On the Windows desktop, double-click **My Computer**.
2. On the View menu, select **Options** or **Folder Options**.
3. Click the **File Types** tab.
4. In the list of file types, click **RTF files** or **Rich Text Format**.
5. Click **Edit**.
6. In the Actions box, click **Open**.
7. Click **Edit**.
8. Select the word processing software you want to use to edit PCLaw invoices. (Use the **Browse** button to find the appropriate software.)
9. Click **OK**.

10. Click **Close**.

Click **Close** again.

If you forgot to use the Editor output option when a bill was created, simply use the **Recreate Bill** function from the Billing menu and select the Editor output option.

You can reduce the balance owing on an outstanding invoice with the Change Bill function:

1. On the **Billing** menu, select **Change Bill**.
2. In the **Matter** box, type or select the matter nickname.
3. In the **Invoice** box, type or select the invoice number that you want to write off.
4. In the **Task Code** box, select a task code that describes the write off. (Many clients use WD — Write Down.)
5. In the **Explanation** box, describe why the bill is being changed. (Many clients use "To write off uncollectable Accounts Receivable".)
6. In the **New Amount** boxes, enter all zeroes. When you tab out of a **New Amount** box, the amount of the write off is shown in the **Change** box as a negative number.
7. In the **Disbursement (G/L Account)** box, type or select the G/L account to debit with the disbursement write off amount.

**Note:** With the Cash method of accounting, PCLaw debits the account specified and credits 1210 — Client Disbursement Recoverable. Modified Cash systems debit the account specified and credit 5010 — Client Disbursement Expense. Accrual systems debit the account specified and credit 1200 — Accounts Receivable.

8. Click **OK**.

**Note:** Consult your accountant or bookkeeper to determine which G/L account you should use for disbursement write-offs.

**For a detailed explanation of the debits and credits of the Change Bill function,** see page 246 to page 251 of the user manual.

Bills can also be written up or written down using this method. If the amount in the Change column is positive, the bill is written up (in other words, the amount owing is increased). If the amount in the Change column is negative, the bill is written down (or the amount owing is decreased).

## Taxes

**For firms using GST or VAT. - I received a \$500 GST/VAT refund from the government. How do I enter this receipt?**

**There are three steps to process the GST/VAT refund:**

- A. Record the receipt using the Firm Receipt function.
- B. Reallocate the GST/VAT as a refund using the General Cheque function.
- C. Allocate the receipt to the GST/VAT Journal and correct the General Bank journal using the General Cheque function.

**A. Record the receipt using the Firm Receipt function:**

1. On the **Data Entry** pull-down menu, point to **General** and click **Firm Receipt**.
2. In the **Receipt** area:
3. Type the name of the government agency in the **From** box.
4. Type or select the date in the **Date** box. To use a calendar, double-click in the box.
5. Type **500** in the **Amount** box.
6. Type **GST/VAT Refund** in the **Explanation** box.
7. In the **Allocation** area:
8. Accept the value of 500 in the Amount box.
9. Type or select **G/L account 9999**, or Suspende if you use the Simplified set of G/L accounts, in the **G/L Account** box.
10. To save the receipt, click **OK**.

**B. Reallocate the GST/VAT as a refund using the General Cheque function:**

1. On the **Data Entry** pull-down menu, point to **General** and click **Cheque**.
2. In the **Cheque** area:
3. Type **ADJ** in the **Cheque** box.
4. Type the name of the government agency in the **To** box.
5. Type or select the date in the **Date** box. To use a calendar, double-click in the box.
6. Type **500** in the **Amount** box.
7. Type or select **E** from the **Pay GST/VAT** list.
8. Accept the amount of **0.00** in the **GST/VAT** box.
9. Type **Reallocate receipt** in the **Explanation** box.
10. In the **Allocation** area:

11. Leave the **Matter** box empty.
12. Leave the **GST/VAT** box empty.
13. Accept the amount of **500** in the **Amount** box.
14. Type or select G/L account 9999, or Suspense if you use the Simplified set of G/L accounts, in the **G/L Account** box.
15. To save the entry, click OK

**C. Allocate the receipt to the GST/VAT Journal using the General Cheque function:**

1. On the **Data Entry** pull-down menu, point to **General** and click **Cheque**.
2. In the **Cheque** area:
3. Type **ADJ** in the **Cheque** box.
4. Type the name of the government agency in the **To** box.
5. Type **-500** in the **Amount** box.
6. Select **Z** from the Pay GST/VAT list.
7. Type **GST/VAT Refund** in the **Explanation** box.
8. To save the entry, click **OK**.

**For firms using GST or VAT. - I received a \$10.70 refund that includes GST/VAT from ComPro Software, Inc., a vendor. How do I enter this receipt?**

**There are two steps to process a refund including GST/VAT from the vendor:**

- A. Record the receipt using the Firm Receipt function.
- B. Reallocate the GST/VAT as a refund using the General Cheque function.

**A. Record the receipt using the Firm Receipt function:**

1. On the **Data Entry** pull-down menu, point to **General** and click **Firm Receipt**.
2. In the **Receipt** area:
3. Type **ComPro Software, Inc.** in the **From** box.
4. Type or select the date of the receipt in the **Date** box.
5. Type **10.70** in the **Amount** box.
6. Type **GST/VAT Refund from Vendor** in the **Explanation** box.
7. In the **Allocation** area:

8. Accept the amount of **10.70** in the **Amount** box.
9. Type or select the appropriate **Software Expense** account in the **G/L Account** box.
10. To save the entry, click **OK**.

**B. Re-allocate the GST/VAT portion of the receipt to the GST/VAT Journal using the General Cheque function:**

1. On the **Data Entry** pull-down menu, point to **General** and click **Cheque**.
2. In the **Cheque** area:
3. Type **ADJ** in the **Cheque** box.
4. Type **ComPro Software, Inc.** in the **To** box.
5. Type or select the date in the **Date** box.
6. Type **0.00** in the **Amount** box.
7. Type or select **Y** in the **Pay GST/VAT** box.
8. Type **-0.70** in the **GST/VAT** box.
9. Type **Reallocate receipt** in the **Explanation** box.
10. In the **Allocation** area:
11. Leave the **Matter** box empty.
12. Leave the **GST/VAT** box empty.
13. Accept **.70** in the **Amount** box.
14. Type the appropriate Software Expense account in the **G/L Account** box or double-click to select from a list of G/L accounts.
15. To save the adjustment, click **OK**.

**Interest**

**I charge interest on overdue accounts; however, I do not charge interest for the first 30 days. Can I do this in PCLaw?**

Yes. In PCLaw, specify a grace period:

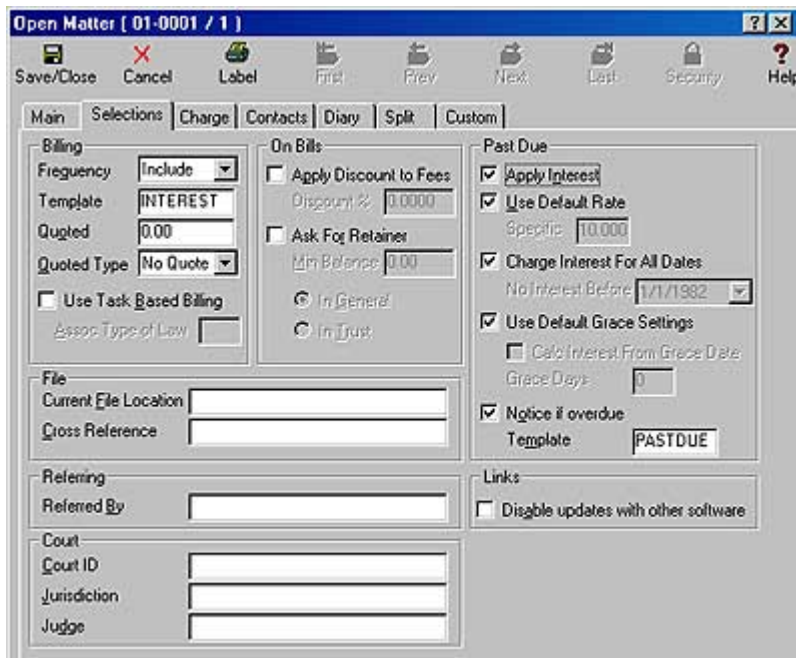

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Interest tab**. (If you have PCLawPro or the Past Due Notices optional module, click the **Past Due Notices** tab.)
3. In the **Grace Period** area, click **30 Days**. (If you have PCLawPro or the Past Due Notices optional module, select **End of Grace Period** and type **30** in the **Days** box.)

4. Click **OK**.
5. PCLaw will not charge interest on overdue accounts for the first 30 days after the invoice date.

### How can I prevent one matter from being charged interest on their overdue account?

Disable interest for the one matter:

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

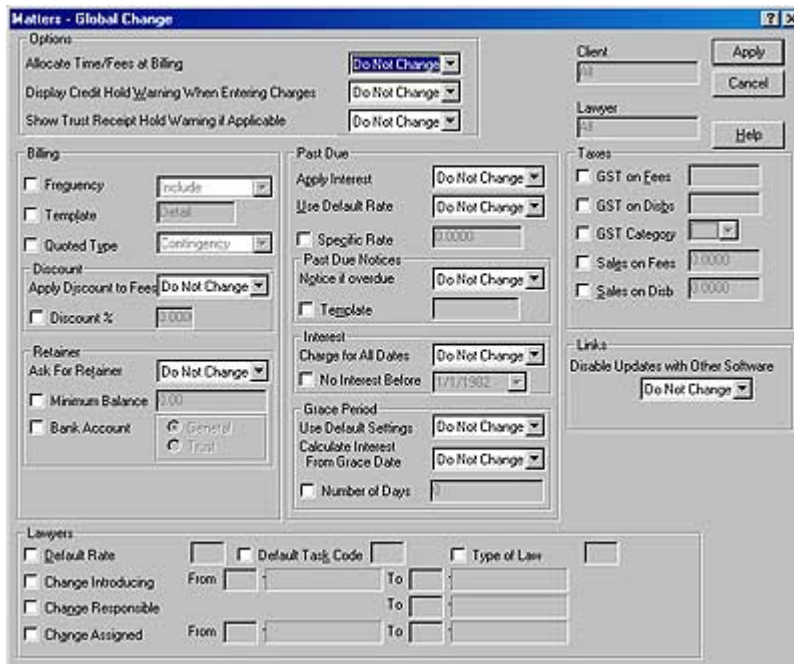

The screenshot shows the 'Open Matter [ 01-0001 / 1 ]' dialog box. The 'Selections' tab is selected. The 'Billing' section has 'Frequency' set to 'Include', 'Template' set to 'INTEREST', and 'Quoted' set to '0.00'. The 'On Bills' section has 'Apply Discount to Fees' checked with a discount of '0.0000', and 'Ask For Retainers' checked with 'Min Balance' set to '0.00'. The 'Past Due' section has 'Apply Interest' checked, 'Use Default Rate' checked, 'Specific' set to '10,000', 'Charge Interest For All Dates' checked, 'No Interest Before' set to '1/1/1982', 'Use Default Grace Settings' checked, 'Grace Days' set to '0', and 'Notice if overdue' checked with 'Template' set to 'PASTDUE'. The 'Links' section has 'Disable updates with other software' unchecked. The 'File', 'Referring', and 'Court' sections have empty input fields.

5. In the **Past Due** area, clear the **Apply Interest** box.
6. Click **Save/Close**.
- 7.
8. PCLaw will not charge interest on this matter.

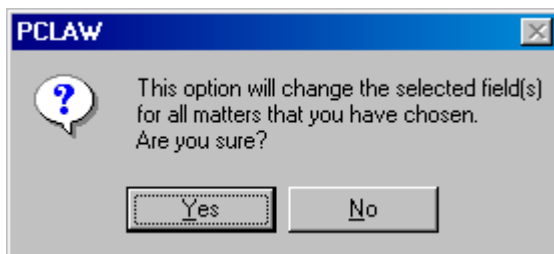

### I want to charge interest on overdue accounts as of September 1. How can I charge interest as of September 1 but not before that date?

**To prevent interest being charged before a specific date on all matters:**

1. On the **File** pull-down menu, point to **Matter** and click **Global Change**.
2. On the **Select Matters to View** window, click OK.
3. At the prompt, click **OK**. The following window appears:

4. In the **Charge for All Dates** box, click **Clear**.
5. Select **No Interest Before** and type or select the date on which to begin charging interest.
6. Click the **Apply** button. You see the following prompt:

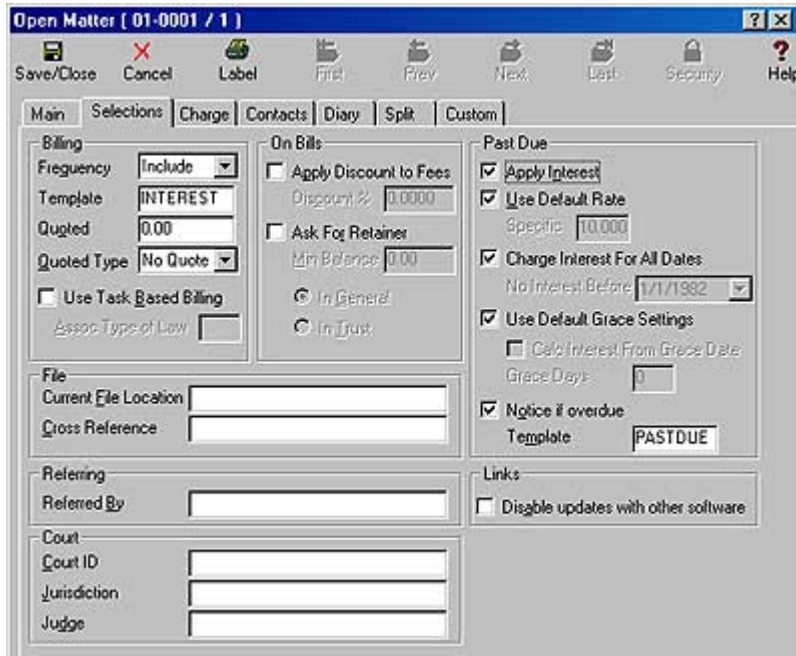

7. To change the interest settings for all matters, click **Yes**.

PCLAW changes the interest settings on the Selections tab of the Open Matter window for all matters.

**To prevent interest being charged before a specific date on one matter:**

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

The screenshot shows the 'Open Matter' dialog box with the following details:

- Title Bar:** Open Matter [ 01-0001 / 1 ]
- Toolbar:** Save/Close, Cancel, Label, First, Prev, Next, Last, Security, Help
- Navigation Tabs:** Main, Selections (selected), Charge, Contacts, Diary, Split, Custom
- Billing Section:**
  - Frequency: Include
  - Template: INTEREST
  - Quoted: 0.00
  - Quoted Type: No Quote
  - Use Task Based Billing:
  - Assoc. Type of Law:
- On Bills Section:**
  - Apply Discount to Fees:  (Discount %: 0.0000)
  - Ask For Retainer:  (Min Balance: 0.00)
  - In General:  (In Trust: )
- Past Due Section:**
  - Apply Interest:
  - Use Default Rate:  (Specific: 10,000)
  - Charge Interest For All Dates:  (No Interest Before: 1/1/1982)
  - Use Default Grace Settings:  (Calc Interest From Grace Date: )
  - Grace Days: 0
  - Notice if overdue:  (Template: PASTDUE)
- File Section:**
  - Current File Location:
  - Cross Reference:
- Referring Section:**
  - Referred By:
- Court Section:**
  - Court ID:
  - Jurisdiction:
  - Judge:
- Links Section:**
  - Disable updates with other software:

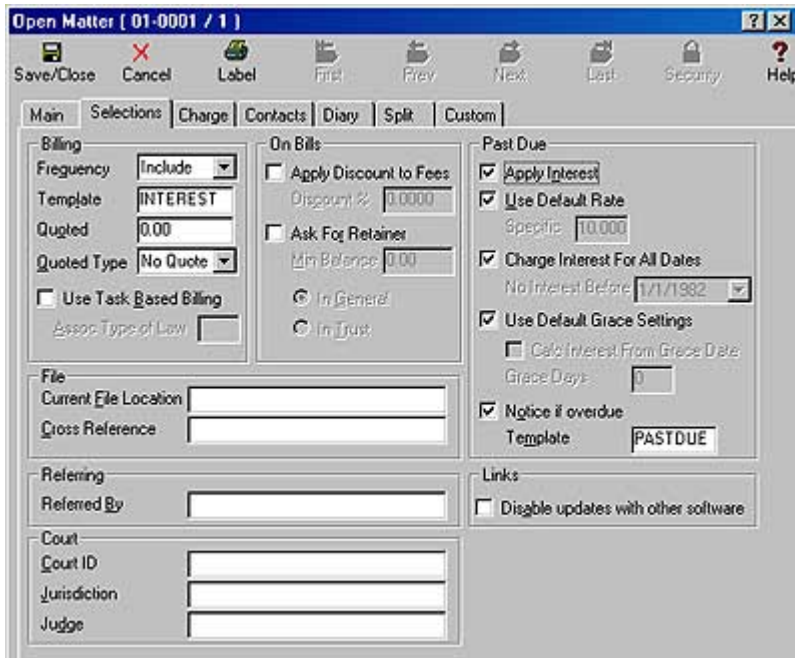

5. In the Past Due area, clear the **Charge Interest For All Dates** check box.
6. Type the date on which to begin charging interest in the **No Interest Before** box.
7. Click **Save/Close**.
- 8.
9. PCLaw does not charge interest before the specified date for the one matter.

**I charge interest of 10% but I'd like to charge 6% for one matter. How can I charge a different rate for one matter?**

Override the default interest rate assigned to new matters.

To override the interest rate for a particular matter:

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

The screenshot shows the 'Open Matter' dialog box with the 'Selections' tab selected. The 'Billing' section includes 'Frequency' (Include), 'Template' (INTEREST), 'Quoted' (0.00), and 'Quoted Type' (No Quote). The 'On Bills' section has 'Apply Discount to Fees' (unchecked), 'Discount %' (0.0000), 'Ask For Retainer' (unchecked), and 'Min Balance' (0.00). The 'Past Due' section has 'Apply Interest' (checked), 'Use Default Rate' (checked), 'Specific' (10.000), 'Charge Interest For All Dates' (checked), 'No Interest Before' (1/1/1982), 'Use Default Grace Settings' (checked), 'Calc Interest From Grace Date' (unchecked), 'Grace Days' (0), and 'Notice if overdue' (checked). The 'Links' section has 'Disable updates with other software' (unchecked). Other sections include 'File', 'Referring', and 'Court' with various input fields.

5. Clear the **Use Default Rate** box.
6. Type the rate to use for this matter in the **Specific** box.
7. Click **Save/Close**.
8. PCLaw assigns the interest rate defined here to all new invoices created for this matter.

**I processed some invoices but the interest rate assigned to them is incorrect. How can I change the interest rate assigned to existing invoices?**

To change the interest rate assigned to existing invoices:

1. On the **Billing** pull-down menu, click **Change Interest on Invoices**.
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. To change the interest rate for one invoice, type the invoice number in the **Invoice** box or double-click to select from a list of invoices.
4. - or -
5. To change the interest rate for all invoices, leave the **Invoice** box empty.
6. To change the interest rate for invoices created between a specific set of dates, type the date range in the **Start Date** and **End Date** boxes.
7. Type the interest rate to assign to the invoices in the Interest Rate box.
8. Click **OK**.
9. PCLaw changes the interest rate assigned to all invoices with the specified criteria.

**For PCLawPro or the Past Due Notices optional module.  
The interest rates I charge are based on the bank's prime rate plus 2%. I update these rates on a monthly basis. How can I charge different rates each month?**

Set up an interest rate table:

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Past Due Notices** tab.
3. Click Use **Rate Table**.
4. Click the **Set Rates** button. The Interest Rates with Effective Dates window appears:

Use this window to associate specific interest rates with specific dates.

**Note:** The first entry, 01/01/1982, is the rate to use for any invoices with a date prior to the first entry.

Date	Interest
01/01/1982	6.5
10/1/2001	6.00
11/1/2001	5.5

5. Click **OK**.

**Example:**

You charge the bank's prime rate plus 2% for interest and you update the table every 3 months. Your table might look like this:

Date	Rate
12/1/00	8.25
9/1/00	8.00
3/1/01	7.75
6/1/01	8..25

Assume the invoice date for a bill is November 4, 2000 and there is a 30 day grace period which expires on December 4, 2000. If a past due notice is created for the client on April 1, 2001, interest will be calculated based on:

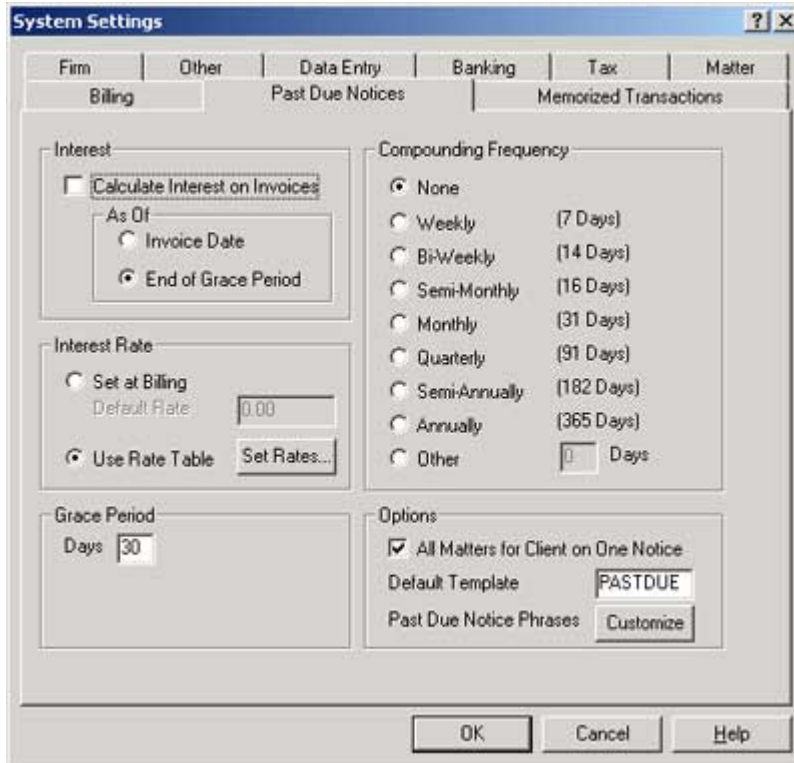

- 86 days at 8.00% (27 in December, plus January and February).

•32 days at 7.75% (March, plus April 1).

**For PCLawPro or the Past Due Notices optional module.  
How can I compound the interest on invoices twice per year?**

Select a compounding frequency:

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Past Due** Notices tab. The following window appears:

3. In the **Compounding Frequency** area, select **Semi-Annually**.
4. Click **OK**.
- 5.
6. After 6 months, PCLaw charges interest on the accumulated interest.

**For PCLawPro or the Past Due Notices optional module.  
The grace period for interest on invoices is 30 days but for a few matters I would like to extend their grace period to 60 days. How can I do this in PCLaw?**

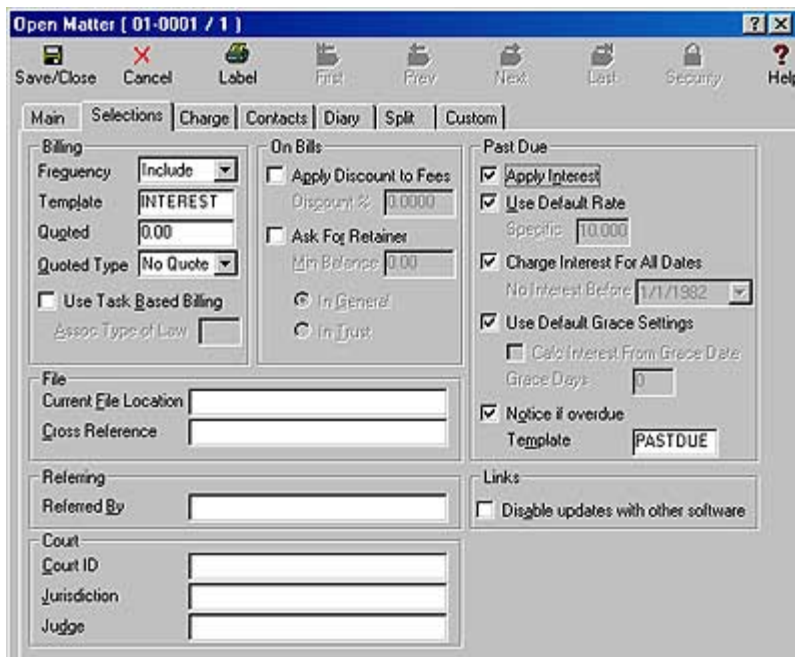

Yes. In PCLaw, specify a grace period:

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Interest** tab. (If you have PCLawPro or the Past Due Notices optional module, click the **Past Due Notices** tab.)
3. In the **Grace Period** area, click **30 Days**. (If you have PCLawPro or the Past Due Notices optional module, select **End of Grace Period** and type **30** in the **Days** box.)
4. Click **OK**.

PCLaw will not charge interest on overdue accounts for the first 30 days after the invoice date.

Disable interest for the one matter:

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

The screenshot shows the 'Open Matter' dialog box with the 'Selections' tab selected. The 'Past Due' section is expanded, showing the following options:

- Apply Interest**
- Use Default Rate**
- Specific:
- Charge Interest For All Dates**
- No Interest Before:
- Use Default Grace Settings**
- Calc Interest From Grace Date**
- Grace Days:
- Notice if overdue**
- Template:

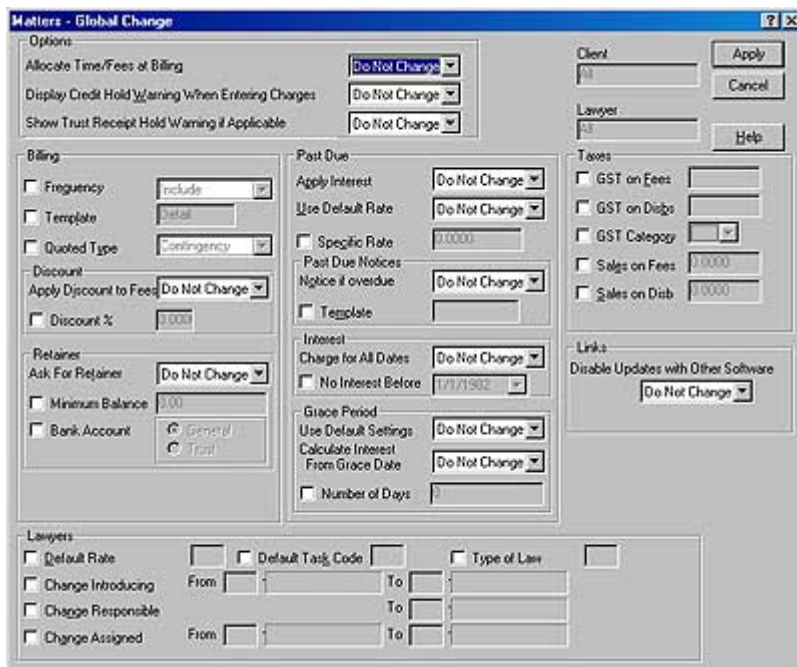

5. In the **Past Due** area, clear the **Apply Interest** box.

Click **Save/Close**.

PCLaw will not charge interest on this matter.

**To prevent interest being charged before a specific date on all matters:**

1. On the **File** pull-down menu, point to **Matter** and click **Global Change**.
2. On the **Select Matters to View** window, click **OK**.
3. At the prompt, click **OK**. The following window appears:

4. In the **Charge for All Dates** box, click **Clear**.
5. Select **No Interest Before** and type or select the date on which to begin charging interest.
6. Click the **Apply** button. You see the following prompt:

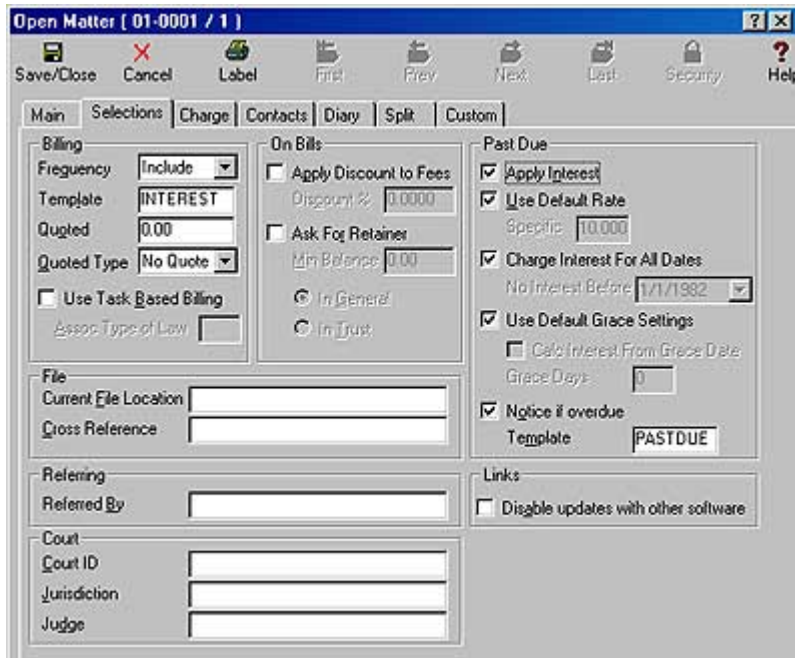

7. To change the interest settings for all matters, click **Yes**.

PCLaw changes the interest settings on the Selections tab of the Open Matter window for all matters.

**To prevent interest being charged before a specific date on one matter:**

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

The screenshot shows the 'Open Matter [ 01-0001 / 1 ]' dialog box with the 'Selections' tab selected. The 'Past Due' section is highlighted, showing the following settings:

- Apply Interest
- Use Default Rate
- Specific: 10,000
- Charge Interest For All Dates
- No Interest Before: 1/1/1982
- Use Default Grace Settings
- Calc Interest From Grace Date
- Grace Days: 0
- Notice if overdue
- Template: PASTDUE

5. In the Past Due area, clear the **Charge Interest For All Dates** check box.
  6. Type the date on which to begin charging interest in the **No Interest Before** box.
- Click **Save/Close**.

PCLaw does not charge interest before the specified date for the one matter.

Override the default interest rate assigned to new matters.

To override the interest rate for a particular matter:

1. On the toolbar, click .

2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

The screenshot shows a software window titled "Open Matter [ 01-0001 / 1 ]" with a "Selections" tab selected. The window is divided into several sections:

- Billing:** Includes a "Frequency" dropdown set to "Include", a "Template" dropdown set to "INTEREST", a "Quoted" text box with "0.00", and a "Quoted Type" dropdown set to "No Quote". There are also checkboxes for "Use Task Based Billing" and "Assoc. Type of Law".
- On Bills:** Includes checkboxes for "Apply Discount to Fees" (unchecked) and "Ask For Retainers" (unchecked). There are text boxes for "Discount %" (0.0000) and "Min. Balance" (0.00). Radio buttons are present for "In General" and "In Trust".
- Past Due:** This section is highlighted. It contains several checked options: "Apply Interest", "Use Default Rate", "Charge Interest For All Dates", "Use Default Grace Settings", and "Notice if overdue". There are also unchecked options: "Calc. Interest From Grace Date". Text boxes include "Specific" (10.000), "No Interest Before" (1/1/1982), and "Grace Days" (0). A "Template" dropdown is set to "PASTDUE".
- File:** Includes text boxes for "Current File Location" and "Cross Reference".
- Referring:** Includes a text box for "Referred By".
- Court:** Includes text boxes for "Court ID", "Jurisdiction", and "Judge".
- Links:** Includes a checkbox for "Disable updates with other software" (unchecked).

5. Clear the **Use Default Rate** box.
6. Type the rate to use for this matter in the **Specific** box.
7. Click **Save/Close**.

PCLaw assigns the interest rate defined here to all new invoices created for this matter.

To change the interest rate assigned to existing invoices:

1. On the **Billing** pull-down menu, click **Change Interest on Invoices**.
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. To change the interest rate for one invoice, type the invoice number in the **Invoice** box or double-click to select from a list of invoices.
4. - or -
5. To change the interest rate for all invoices, leave the **Invoice** box empty.
6. To change the interest rate for invoices created between a specific set of dates, type the date range in the **Start Date** and **End Date** boxes.

7. Type the interest rate to assign to the invoices in the Interest Rate box.
8. Click **OK**.

PCLaw changes the interest rate assigned to all invoices with the specified criteria.

Set up an interest rate table:

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Past Due Notices** tab.
3. Click Use **Rate Table**.
4. Click the **Set Rates** button. The Interest Rates with Effective Dates window appears:

Use this window to associate specific interest rates with specific dates.

**Note:** The first entry, 01/01/1982, is the rate to use for any invoices with a date prior to the first entry.

Date	Interest
01/01/1982	6.5
10/1/2001	6.00
11/1/2001	5.5

5. Click **OK**.

**Example:**

You charge the bank's prime rate plus 2% for interest and you update the table every 3 months. Your table might look like this:

Date	Rate
12/1/00	8.25
9/1/00	8.00

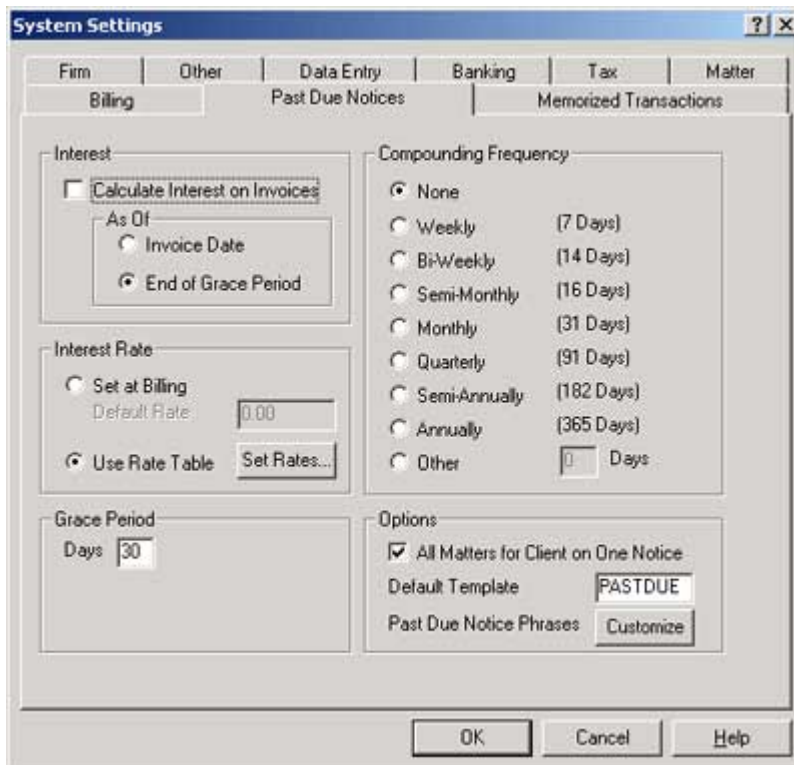

3/1/01      7.75  
6/1/01      8..25

Assume the invoice date for a bill is November 4, 2000 and there is a 30 day grace period which expires on December 4, 2000. If a past due notice is created for the client on April 1, 2001, interest will be calculated based on:

- 86 days at 8.00% (27 in December, plus January and February).
- 32 days at 7.75% (March, plus April 1).

Select a compounding frequency:

1. On the **Options** pull-down menu, click **System Settings**.
2. Click the **Past Due Notices** tab. The following window appears:

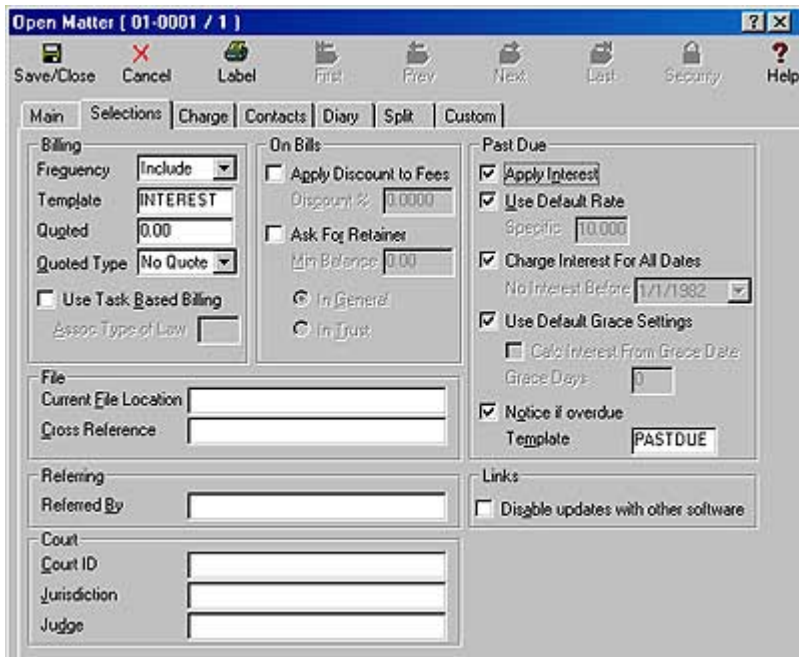

3. In the **Compounding Frequency** area, select **Semi-Annually**.  
Click **OK**.

After 6 months, PCLaw charges interest on the accumulated interest.

To extend the grace period for a few matters, assign the specific matters a unique grace period:

1. On the toolbar, click .
2. Type the matter nickname in the **Matter** box or double-click to select from a list of matters.
3. Click **OK**.
4. Click the **Selections** tab. The following window appears:

5. Clear the Use **Default Grace Settings** box.
6. Select **Calc interest from Grace Date**.
7. Type **60** in the **Grace Days** box.

Click **OK**.

After 60 days, PCLaw charges interest on this matter's overdue amounts.

## Reports and Retrieving Information

**On the Quick Summary, I see the A/R balance. How do I find out the invoices that are unpaid?**

The A/R balance on the Quick Summary window appears on a push button as illustrated below. Click the button to display the invoices that make up that balance. All balances in the Quick Summary window have "Drill Down" buttons.

### How can I quickly look up the balances of a matter?

To see the status of a matter without printing a report, you can use the Quick Summary feature.

1. In PCLaw, hold down the **Ctrl** key while you press **Y**.
2. Type or select the matter nickname.
3. Click **Select**.

The screen displays general information about the matter and a summary of accounting information. The following information is displayed:

- Last Trust**      Date of last trust transaction.
- Last Billed**      Date of last bill.
- Last Entry**      Date of last transaction.
- A/R Bal**      Total amount owing from bills.
- Unbd Disb**      Total amount of advanced costs which have not yet been billed.
- Unbd Fees**      Total amount of time and fee entries which have not yet been billed.
- Total Trust**      Total amount held in the trust bank account for this matter.
- Gen Rtnr**      Total amount of receipts which have not been applied to outstanding invoices.
- Unbd Hrs**      Total number of hours spent on this matter which have not yet been billed.
- Trust Bals**      Lists the balance held in each trust bank account.

**To see a summary of all matters for a particular client**, omit the matter nickname and type a client nickname.

### Which report shows all of today's general checks?

To produce a list of checks issued for a particular day, use the **General Bank** function on the **Reports - Journals** menu.

1. Use today's date in the **Start Date** and **End Date** boxes.
2. In the **Include** area, select **Disbs**.
3. To include checks from all bank accounts, leave the **Acct** box empty.
4. — or —
5. Enter a bank account nickname in the **Acct** box to restrict the report to one general bank account.
6. Leave the **Che/Rec #** and **G/L Account** boxes empty.
7. Select **Printer** in the **Output** area.

**If you want a list of receipts only**, select **Receipts** in the **Include** area. You can include both disbursements and receipts by selecting **Both**.

### When I print a general bank journal, it includes all the checks and receipts from all the general accounts. How can I get a list of transactions from one account only?

If you need a list of entries from one bank account only, simply select a bank account nickname. The report will be restricted to entries from that account only.

### I want to produce a report that shows all the unbilled time for a specific lawyer's matters. Where can I find this information?

Use the **Work in Progress** report from the **Reports - Clients** menu.

On the **Common** tab:

1. Leave the **Matter** box empty.
2. Leave the **Client** box empty.
3. Type or select the nickname for the responsible lawyer for which you would like to produce the report.
4. In the **End Date** box, use today's date to see a list of unbilled time as of today.
5. Deselect the **Totals Only** check box.
6. Deselect the **Firm Totals Only** check box.

On the **Matters** tab:

1. Accept all the preset selections.

On the **Advanced** tab:

1. Select the **Time/Fees** check box.

2. Deselect the **Disbs** check box.
3. Accept today's date in the **Age From** box to age all entries as of today.

The report lists all the unbilled time and fee entries for all matters that have the responsible lawyer that you specified.

## Bank Reconciliation

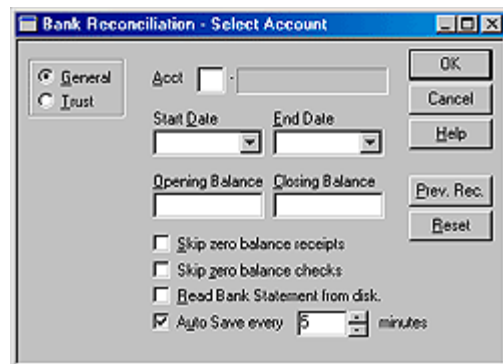

### How do I reconcile my first bank statement in PCLaw?

To reconcile the first bank statement, make sure you have the following items:

- completed bank reconciliation for the previous period
- bank statement for the current period

Then follow these instructions:

- 1 On the **Tools** pull-down menu, click **Bank Reconciliation**.  
The Select Account window appears: (see right hand image)

- 2 Select either **General** or **Trust**.
- 3 In the **Acct** box, type the bank account to reconcile or double-click to select from a list of bank accounts.
- 4 Type the starting date from the bank statement in the **Start Date** box or double-click to use the calendar.
- 5 Type the ending date from the bank statement in the **End Date** box or double-click to use the calendar.
- 6 Type the beginning balance from the bank statement in the **Opening Balance** box.
- 7 Type the ending balance from the bank statement in the **Closing Balance** box.
- 8 Select **Skip zero balance receipts** to ignore receipts with a value of 0.00.
- 9 Select **Skip zero balance checks** to ignore checks with a value of 0.00.
- 10 Deselect **Read Bank Statement from disk**.
- 11 Select **Auto Save every** and specify the number of minutes to have PCLaw automatically save the bank at the specified frequency.
- 12 Click **OK**. The Mark Items window appears.

Date	Chk...	Paid To/Received From	Type	Amount
Nov 1/2001	00002	Toothbreaker Foods, Inc.	Receipt	1500.00 ✓
Nov 12/2001	00001	Karen Maxwell	Receipt	1200.00 ✓
Nov 15/2001	00003	John Davidson	Receipt	1400.00 ✓
Nov 12/2001	00001	One Two Three Courier	Check	11.00 ✓
Nov 18/2001	00002	City of New York	Check	25.00 ✓

Opening Balance	Cleared Checks	Cleared Receipts	Errors New-Cleared	Calculated Closing Bal	Difference
3348.61	36.00	4100.00	0.00	7412.61	1109.60

- 1 Click **Prior** to enter outstanding checks and receipts from the previous reconciliation.
- 2 Click a transaction to marked it cleared (with a check mark **P**) or outstanding (no check mark).
- 3 Click **Select All** or **Deselect All** to mark all items cleared or outstanding respectively.
- 4 Click **Find & Mark** to find a specific check and mark it cleared automatically.
- 5 Click **New Errors** to enter new errors from the bank statement. Use positive amounts when the bank errs in your favor and negative amounts when the bank errs in their favor.
- 6 When the difference is zero (see the **Difference** box at the bottom of the Mark Items window), the following message appears:

This account is balanced and can be reconciled.  
To proceed to the next bank reconciliation period, select the OK button.

HINT: Ensure that the reconciliation report has printed successfully before selecting OK.  
And be sure to close the month after you have reconciled all your bank and G/L accounts.

Close

- 7 Click **Close**.
- 8 Click **Report** to print the Reconciliation Report.
- 9 Click **OK** to proceed to the next reconciliation period.

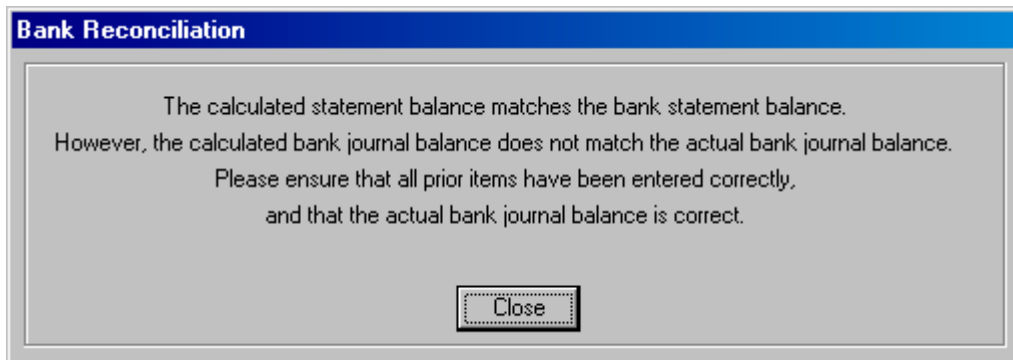

## Reconciliation Tips

If the difference is not zero, look for:

- Entries marked cleared that are actually outstanding.
- Cleared entries on the bank statement that are not in PCLaw.
- Duplicate entries in PCLaw.
- Entries with incorrect amounts.
- Entries with the incorrect bank account.
- Entries with incorrect dates.
- Bank balances that do not match the previous period's reconciliation.

If the difference is evenly divisible by nine, look for entries with transposed numbers (42 instead of 24) or with the decimal point in the wrong place (3.10 instead of 31.00).

If the difference is zero at the bottom of the window but the calculated closing balance is not equal to PCLaw's bank journal balance, the following message appears:

This occurs when:

- An outstanding check or receipt from a previous period is not entered using the **Prior** button.
- The general bank opening balance is incorrect (use **Tools>General Bank Opening Balances** to correct the opening bank balance).

**I've reconciled my bank and the Calculated Closing Balance is zero but I get the message "The calculated statement balance matches the bank statement balance. However, the calculated bank journal balance does not match the actual bank journal balance...". What does this mean?**

This message means that the bank statement is balanced, but when this reconciled balance is compared to the "book" balance in PCLaw, it is not the same. It appears when:

- you are performing the first reconciliation in PCLaw and have not entered all the outstanding checks or receipts from a previous period
- the bank opening balance was entered incorrectly with the **General Bank Opening Balances** function (when reconciling a General bank account)
- the trust opening balances were entered incorrectly with the **Matter Opening Balances** function (when reconciling a Trust bank account)
- an entry was made in a month where the bank was already reconciled (known as a backdated entry)

If this is your first reconciliation, make sure all outstanding checks and receipts have been entered using the Prior button in the Bank Reconciliation window, check the General Bank Opening Balances on the Tools pull-down menu and check the Matter Opening Balances on the Tools pull-down menu.

If a backdated entry has been made, change the date of the entry to the month you are reconciling. If you cannot change the date, you must reprocess the bank reconciliation for the month with the backdated entry and every month after it.

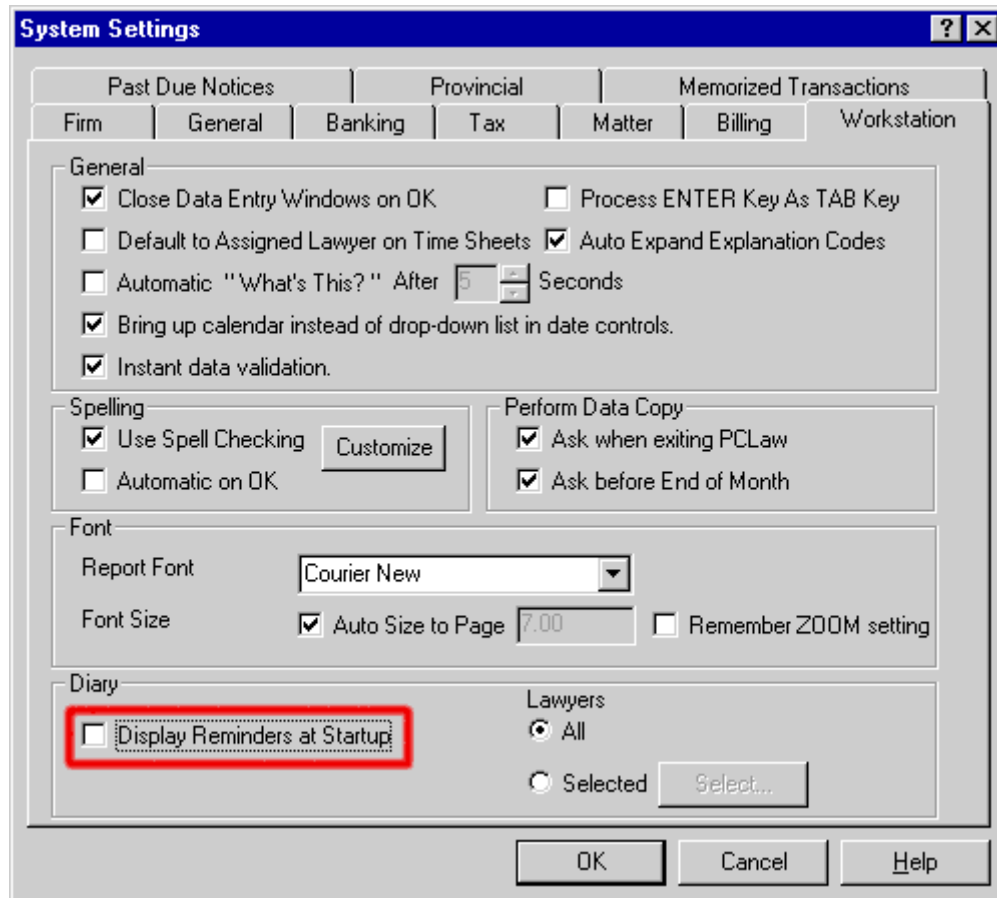

To prevent a backdated entry from occurring in the future, read all PCLaw messages carefully when entering transactions. PCLaw warns you when you are attempting to make a backdated entry.

## Calendar

### How do I turn off the Diary listing that appears the first time I start PCLaw each day?

The first time you start PCLaw every day, the Calendar/Diary Report appears automatically to remind you of your appointments.

If you do not want this report to appear automatically, select **System Settings** from the **Options** pull-down menu. On the **Workstation** tab, deselect **Display Reminders at Startup** and click **OK**.

## Payroll

### I just closed a payroll period and realized that one of the checks needs to be adjusted. How can I reprocess this check?

The easiest way to adjust a check from a payroll period that was just closed is to reopen the entire payroll period and reprocess the period. Follow these steps:

1. Use the **File - Recover** function in payroll to reopen the payroll period.
2. Use the **G/L - Journal Entry - Change** function in PCLaw to delete the journal entry produced by Payroll.
3. Use the **Working With (General Bank)** function to remove all the payroll checks for the period.
4. Use the **Check - Regular** function in Payroll to reprocess the payroll checks.

### What is the purpose of the Check - After the Fact function? (American firms)

**Check - After the Fact** lets you enter the details of a payroll check into the payroll system without affecting your PCLaw bank journal or general journal. It is most often used to record a payroll check that was processed manually.

### Why is Line 2 on the Federal 941 Worksheet different from the gross wages for the quarter? (American firms)

In PCLaw, the Payroll optional module prints the taxable wages on line 2, not the gross wages. Taxable wages are those upon which federal tax was charged.

Taxable wages may be higher than gross wages if there is a company benefit, non-cash earning, or a pretax deduction where the employer matches the employee contribution.

Taxable wages may be lower than gross wages if there is a pretax deduction such as a 401K or Cafeteria plan. Some plans reduce the amount of taxable wages by the amount of the employee contribution.

### How do I process a separate Bonus Check? (US Firms)

To produce separate bonus checks with taxes, follow these steps:

1. Process bonus checks before processing regular checks.
2. On the **Company** menu, point to **Earnings** and select **Other Earnings-1**. Select the **Supplemental Checks** check box. Click **OK**.
3. On the **Company** menu, point to **Taxes** and select **Social Security**. Select the **Supplemental Checks** check box. Click **Next**.
4. On each of the tax screens that follow, select the **Supplemental Checks** check box for each tax that should be deducted from the bonus check.
5. On the **Check** menu, select **Regular**.
6. Select the **Supplemental check** box and click **OK**. (If the box is unavailable, repeat steps 2 to 4.)
7. For each employee who is receiving a bonus check,

8. • Select the **employee**.
9. • Click **Ask/Occasional**.
10. • Type the gross amount of the bonus in the **Bonus** box.
11. • Click **OK**.
12. For each employee who is not receiving a bonus check, • Select the employee. • Click **Put On Leave**.
13. To automatically **calculate** the taxes, click Calculate. (Tax amounts can be overridden using the **Override** button. Check with your Accountant before using this option.)
14. To print the bonus checks, click **Checks**.
15. To print the reports and finalize the pay period, click **Close Period**.
16. **Post** the payroll period.

#### **I manually processed a payroll check and entered it into PCLaw. How do I enter this check in Payroll?**

Use the **Check - After the Fact** function to add a check to payroll that has already been printed and saved in PCLaw. After the Fact checks appear on the Payroll History report and increase the W2 totals for the year; however, they do not post to PCLaw's General Bank Journal or General Journal.

To add a Check - After the Fact, follow these steps:

1. On the **Check** pull-down menu, click **After the Fact**.
2. On the **After the Fact** Payroll Setup window, click the employee who received the check.
3. In the **Check / Period end date** box, type the date of the check.
4. Click the **Edit** button.
5. You see the After the Fact window

After the Fact - Add New Check for Maxwell, Karen R - p/e: 11/07/00 c/d: 11/07/00

Check Number:  Gross Wages:  All Deductions: .00  
 Net Pay: .00

Taxes	Employee	Company	Wages

Dental	408K <input type="text"/>
Disability	Alimony <input type="text"/>

Buttons: Next Employee..., Next check..., Previous check..., Add, Update, Remove, Exit

Deductions: Health Ins. , Stock , Donations

If the Add button is gray, you are looking at an existing After the Fact check. Click the Exit button, change the date by one day and click the Edit button again. You can only have one After the Fact check per day per employee in Payroll.

- or -

If the Add button is black, you are looking at a new After the Fact check. Figures appear automatically based on the numbers from the last regular pay check.

6. Type the check number in the **Check Number** box.
7. **DO NOT USE A CHECK NUMBER OF ZERO.**
8. Change the figures to reflect the check that was already processed in PCLaw.
9. To add the check to Payroll, click the **Add** button.
10. To exit the After the Fact window, click the **Exit** button.
11. To return to the main Payroll window, click the **Exit** button once more.

Notes:

- If you see the warning message, "Tax amounts should not be blank when Wages amount is greater than zero.", you have entered an amount in a **Wages** box without an amount in the corresponding **Employee** and/or **Company** box. Click the **Redo** button to make corrections and click the **Add** button when you are finished.
- If you see the warning message, "Wages amount should not be blank when Tax amounts are greater than zero.", You have entered an amount in an **Employee** and/or **Company** box without an amount in the corresponding **Wages** box. Click the **Redo** button to make corrections and click the **Add** button when you are finished.
- If you are deliberately increasing only the tax or only the wage amount, click the **Ignore** button; however, the integrity of your quarterly federal and state reports may be jeopardized. •If you see the warning message, "Minus value and/or letters are NOT allowed.", You have entered negative numbers or letters in one of the boxes. Click the **Redo** button to make corrections and click the **Add** button when you are finished. ·
- If you are deliberately entering negative numbers to reverse a check, click the **Ignore** button; however, the

integrity of your quarterly federal and state reports may be jeopardized.

### How do I set up a 401(K) Plan.

PCLaw Payroll can handle most pretax deductions such as 401(K) and Cafeteria style plans. It keeps track of both the amount deducted for the employee and the amount contributed by the company, if applicable.

1. Use the **Deductions (pretax)** option on the **Company** menu to enable the plan for this set of books.
2. Use the **Deductions (pretax)** option on the **Employee** menu to enable the plan for individual employees.

On the **Employee - Deductions (pretax)** window:

#### Calculation method

- Use **Amount per period** if the amount to contribute to the plan is the same every pay period.
- Use **Automatic calculation** if the amount to contribute is based on a percentage of gross pay.
- Use **Amount per month** if the amount to contribute each month remains the same regardless of the number of pay periods in a month. (If a pay frequency other than monthly is used, the amount contributed each pay period will vary based on the number of pay periods in the month.)

## General Ledger Accounts

**Debit** Enter the G/L account to debit with the company contribution. This is typically an expense account.

**Credit** Enter the G/L account to credit with both the employee deduction and the company contribution. This is typically a withholding (liability) account.

**For the cash method of accounting:** If you do not want to account for the withholding until it is actually remitted, use the same expense account in both the **Debit** and **Credit** boxes. When the remittance is paid, allocate the check to the expense account. After the remittance is paid, the net balance in this account is the expense portion contributed by the company. (Use a payroll history report for the period in question to determine the amount to remit.)

## Plan Type

The plan type determines whether taxes will be charged on the contributions.

### 401(K) Plan

Social Security, Medicare, Federal and State Unemployment, State Disability and Workers Compensation calculations are based on the Gross Wages.

Federal, State and Local Income Tax calculations are based on the Gross Wages minus the Employee Contribution.

### Cafeteria Plan

All tax calculations are based on the Gross Wages minus the Employee Contribution.

User Defined Plan

In **Company - Deductions (Pretax)**, define on which amounts the tax calculations should be based. Use the Taxes for **User Defined** button.

Taxes for 'User Defined'

When 'User Defined' type is selected, include item amount(s) for calculating.

<input checked="" type="checkbox"/> Federal Income Tax	<input type="checkbox"/> State Disability Insurance
<input type="checkbox"/> State Income Tax	<input type="checkbox"/> Worker's Compensation
<input type="checkbox"/> Local Income Tax	<input type="checkbox"/> Federal Unemployment Insurance
<input type="checkbox"/> Social Security	<input type="checkbox"/> State Unemployment Insurance
<input type="checkbox"/> Medicare	

OK Cancel

When a tax is selected, its calculation is based on the Gross Wages plus the Employer Contribution.

When a tax is not selected, its calculation is based on the Gross Wages minus the Employee Contribution.

In this illustration, the federal income tax calculation is based on the gross wages plus the company contribution. The calculation for all other taxes is based on the gross wages minus the employee contribution.

To handle more complicated tax calculations, set up the employee contribution as one pretax deduction with its own set of tax rules and set up the company contribution as a second pretax deduction with its required tax rules.

Consult the firm's accountant or plan administrator to determine which tax rules to use with the plan.

- **Contributions per period** Enter the percentage of gross wages to deduct from the employee's pay plus the percentage contributed by the company.
- **Company paid portion** Enter the percentage of the total that is paid by the company.
- **Yearly maximum** If there is a maximum the employee and company can contribute per year, enter the amount in this box. When the total contributed by the employee and the company reach this amount, Payroll will stop deducting for this plan.
- **Paid so far this year** If Payroll was just installed and contributions have already been made this year, enter the amount already contributed by both the Employee and the Company in this box.
- **W2 box** To show the total employee contribution on the W2 form, select a box number. Box 13 and 14 require a Code or Label that identifies the plan. Consult the firm's accountant or plan administrator to determine the proper code or label to use.

**Example:**

Alumni Law Firm has a retirement plan to which both the employee and the employer contribute. The employee contribution is 3% of their gross wages. The employer will contribute another 3%. The maximum contribution for both the employee and employer is \$6000 per year. When taxes are calculated, federal income tax, state income tax and local income tax are based on the gross wages minus the employee contribution. All other tax calculation are based on the gross wages. The employee contribution must be reported in Box 13 with a Code of D.

The following illustration shows how to set up the retirement plan:

A **401(K)** Plan Type is used because the federal, state and local tax calculations are based on the gross wages minus the employee contribution. All other taxes are based on the gross wages.

Employee - Deductions (pre-tax) - 401K/Cafeteria-1 - Alderson, Donna T

401K

Plan Type  
 401(K)    Cafeteria    User Defined

Calculation method  
 Not used  
 Ask amount each pay  
 Occasional amount  
 Amount per period  
 Amount per month  
 Time card  
 Automatic calculation

Contributions per period: 6 % of gross wages

Company Portion  
 Company paid portion: 50 %  
 Yearly maximum: \$ 6000  
 Paid so far this year: \$

General Ledger Accounts  
 Debit: 5150  
 Employee: 1000  
 Credit: 2290

W2 Box  
 None    12 - Fringe  
 10 - Dep. Care    13 (Code)  
 11 - Nonqual    14 (Label)

Box 13 Code  
 (1): D  
 (2):  
 (3):

Next Employee...   Next...   Previous...   OK   Cancel

Notice how the Contributions per period box contains a 6 - meaning that a total of 6% of the gross wages will be contributed toward the plan. The **Company paid portion** is 50%, meaning half of the contribution is paid by the company.

For example, if the gross wages are \$1000, the total contribution is 6% of \$1000 - \$60.00. Half of this amount is contributed by the company and the other half is deducted from the employee's pay.

#### How can I check the year-end W2 figures in Payroll?

Run a Payroll History report (Report > Pay History) from January 1 to December 31 and compare the figures to a W2 Information report (Report > Employee > W2).

Take into consideration that taxable wages may be higher or lower than gross wages if you have taxable benefits, company benefits, non-cash earnings, non-tax payments or pre-tax deductions such as 401(k) or cafeteria plan.

#### For Former Timeslips Users

#### I've just converted from Timeslips® to PCLaw. What differences in terminology should I be aware of when using PCLaw?

The following table compares Timeslips® and PCLaw terminology:

<b>Timeslips®</b>	<b>PCLaw</b>
Client	Client
Project	Matter
User (or Timekeeper)	Lawyer
Client History	Matter Opening Balances
Expense	Expense Recovery
Slip	Time Entry
Abbreviations/Activity Lists	Explanation Codes
Case Type	Type of Law
Client Status	Billing Frequency
TSLayout	Template Editor
TSTimer	Quick Timer
Navigator	Quick Step

**Why is there a separate function for fees? Timeslips® uses one function to enter both time and fees.**

When PCLaw was first designed in 1982, there were separate time and fee entry functions. Since then, we have added the ability to enter a flat fee with the **Time Entry** function by omitting the hours. Because many of our clients still use the **Fee Entry** function, we have not removed it.

**What is the difference between the Receive Payment function and the General Retainer function?**

The Receive Payment and General Retainer functions are used to receive funds on behalf of a client into the General bank account. The Receive Payment function is used when the funds should be applied to outstanding invoices. The General Retainer function is used when the funds should be applied to future invoices, as in the case of an advance.

**Why do you have to close months? What happens if you do not close them?**

When you close a month in PCLaw, you finalize the General Ledger figures for that month and by doing so, prevent any financial items from being entered in that month. This is useful especially when the bank has been reconciled. When a month is closed, you can no longer make any more entries in that month.

Closing a month also allows PCLaw to do some "housekeeping". Any billed items from closed months over two years old are summarized to reduce hard drive usage.

If you do not close months, your PCLaw data files will continue to expand. Reports will eventually take a long time to produce because PCLaw has to read through large files.

Unlike some accounting systems, you do not have to close a month before entering transactions in the following months.

## What & where are my Timeslips®?

In PCLaw, time records are called Time Entries and they are made using the **Time Sheet** function on the **Data Entry – Time Entry** pull-down menu.

You can view, modify and print time entries using the **Working With (Time Entries)** function from the **Data Entry** pull-down menu.

## Must I wait for the start of my year-end to convert from Timeslips® to PCLaw?

No. You can end a month in Timeslips® and start the next month in PCLaw. For General Ledger purposes, take the year-to-date figures from your accountant and enter them with PCLaw's **G/L Opening Balances** function.

The first month in PCLaw will show year-to-date figures but every month after that will show the correct Income Statement figures for the month.

For audit trail purposes, you should keep your Timeslips® system intact. This way you can still look up entries made prior to converting to PCLaw.

## Other Issues

### Transaction Levy (Ontario firms) - I'm entering a transaction levy. What amount and GST code should I use?

If the matter was opened on or after January 1, 1999, enter \$50.00 as the amount. This is the amount charged before taxes. Use a GST code of N to indicate that there is no GST Input Tax Credit included in the \$50.00. \$50.00 will be added to the Client Ledger. When the levy is billed, the client will be charged \$3.50 GST on top of the \$50.00.

If the matter was opened prior to January 1, 1999, use \$50.00 as the amount and a GST code is Y. This indicates that there is a GST Input Tax Credit included in the \$50.00. PCLaw puts the amount of \$46.96 on the Client Ledger. When the levy is billed, the client will be charged \$3.29 GST on top of the \$46.96.

PCLaw automatically uses the correct amount and GST code based on the Opening Date of the matter. After entering the matter nickname and pressing TAB, the amount and GST code are updated.

## Time Matters® Link - What are the differences between Time Matters® and PCLaw?

The following table compares the terminology used in Time Matters®

and PCLaw:

For more information about the Time Matters®/PCLaw Link, see the Time Matters User Manual:

- Version 3 User Manual – pages 254 to 265
- Version 2 User Manual – pages 217 to 231

**Time Matters®**

Matters

Time Entry

Lawyer

Task Code

Description

Time

**I am working on a contingency case where I will not be billing the matter until the case is completed. The fee will be determined at that time. How can I keep track of the work done without billing the client?**

To prevent the matter from being billed until the case is completed:

1. On the **File** menu, point to **Matter** and click **Open Matter**.
2. Type or select the matter nickname for this case and click **OK**.
3. Click the **Billing/Past Due/Taxes** tab.
4. In the **Frequency** box, select **Exclude**.
5. In the **Quoted Type** box, select **Contingency**.
6. To save your changes, click **OK**.

The billing frequency of Exclude prevents this matter from being billed if you do mass billing.

To make time entries for the work you have done:

1. Enter time dockets using the **Time Sheet** function as you would with any other matter, using a rate of zero on the time entries.

When the case is completed, produce the bill using the **Create Bill** function from the **Billing** menu:

1. On the **Main** tab, type or select the matter nickname in the **Matter** box.
2. Click **OK**.
3. In the **Fees** box, enter the fee amount for the whole case.
4. Click **OK**.
5. On the **Explanation for Fee Adjustment** screen, type in the text to appear on the bill.

6. Click **OK**.

The bill will include a list of time entries with zero dollar amounts and one fee entry with the final fee amount.

**If you do not want the zero-rated time entries to appear on the bill**, use the **Select Charges** feature on the **Options** tab of billing to exclude these entries.

For more information, see "Processing Contingency Matters" on page 269 of the user manual.

#### **I am trying to use the Template Editor but I can't figure it out.**

The template editor is used to modify the layouts of bills, checks, receipts and G/L statements. It is for advanced users who are familiar with desktop publishing programs. If you are not an advanced user, you can use the following resources to help learn about the template editor:

- Thoroughly review "Template Editor" on page 317. It contains complete step-by-step instructions for using the program.
- After you have gone through the chapter on the Template Editor, try modifying some templates in the Experimental Set of Books. You can "play" in this area without affecting your firm's set of books.
- Purchase the Template Editor Training Video.

**When modifying your good templates in PCLaw**, use the **File - Save As** function to make a copy of the original template with a different name. This ensures that if the template is damaged beyond repair, you still have a good copy of the original template to work with.

#### **There is a function on my Tools menu called Verify Data Integrity. What does this do?**

This function reads the selected files and their associated index files to make sure there is no data corruption in your PCLaw files. If any corruption is found, PCLaw will attempt to correct the problem. If a problem is detected that cannot be corrected, a report is printed that can be faxed to LexisNexis PCLaw's Technical Support Department (see "Getting Technical Support" on page 8 of the user manual).

If you experience unusual problems in PCLaw, you should use this function to ensure that all your data files are valid. If the problem persists, contact Technical Support.

**This process can take a long time to complete**, depending on the size of your data files. You may want to start this function at the end of the day and let it run overnight.

#### **Whenever I exit PCLaw I get a message asking if I want the program to make a copy of the data files. What does this do?**

When you exit PCLaw, the program prompts you to make a copy of your data files on your computer's hard drive. PCLaw saves your files in the following default location:

C:\Program Files\ACG\PCLAW32\DATA\BKUP

(If you are running PCLaw on a network, replace "C" with the drive letter that represents your server.)

You can change the location of the copied files by using the **Browse** button.

To copy your PCLaw data files:

1. On the **File** pull-down menu, click **Exit**.
2. The Daily Data Copy window appears:
  1. To change the location of the files, click **Browse** and choose a different path.
  2. To start the copy, click **Yes**.
  - 3.
  4. — or —
  - 5.
  6. To exit PCLaw without copying the files, click **No**.

**To prevent this prompt from appearing** the next time you exit the program, select **Don't ask me again**.

1. If the file copy was successful, this message appears:

2. If the file copy was unsuccessful, you may see this window:

The message may indicate that there is not enough space in the location specified for the files.

1. Click **OK**.

**To turn the copy prompt on or off**, use the Workstation tab in System Settings.

**Warning:** The copy made of your PCLaw data files is **NOT** a backup. You are still responsible for performing a tape/disk backup of your computer on a regular basis.

For more information about backups, see "The Importance of Backups" on page 163.

### **I would like extra copies of the PCLaw User Guide. Where can I get a copy in electronic format that I can print myself?**

The PCLaw User Guide is available in PDF (portable document file) format from within PCLaw.

1. On the Help pull-down menu, click Online Manual.

If the document does not open up, you need Adobe Acrobat Reader. You can download this software free of charge from [www.adobe.com](http://www.adobe.com).

If Online Manual is not listed on the Help pull-down menu, you didn't install the online manual, lessons and quick tour when you installed PCLaw. To install them:

1. Click Start.
2. Point to Programs > Alumni Computer - PCLaw > Setup.
3. Click PCLaw Setup Wizard.
4. On the Books or Components window, select Re-install PCLaw programs on this computer and Online Manual, Quick Tour and Lessons.
5. Click Next.
6. Follow the instructions of the Setup Wizard.

## **Troubleshooting PCLaw**

### **When I attempt to close the month in PCLaw, I receive a message that someone else is in the system. I checked all the workstations on the network; no one else is in PCLaw. Why do I still get this message?**

PCLaw thinks someone is in the program when:

- the program terminates prematurely
- a workstation loses connection with the server

Contact LexisNexis PCLaw Technical Support

### **When I attempt to close a month, I see the message "You may not close more than 12 months in one year." Why does this message appear and how can I close the month?**

This message indicates that 12 months have already been closed and you need to close the year before you can close the month.

To close the year, use the End of Year feature on the G/L pull-down menu.

## **Other Computers and Devices**

### **Will PCLaw run on my handheld computer?**

A mini version of PCLaw called PCLaw TE (Travel Edition) runs on devices with the Palm O/S Version 3.5 or higher, Pocket PC 2002 or 2003 os, and the BlackBerry™ Wireless handheld.

**Where does the Satellite optional module get the e-mail addresses it lists?**

It accesses the e-mail addresses defined for each user in Options > Administrator > Security.
