Send to CaseMap® & Bulk Send to CaseMap Integration

Over 30 litigation support and EDD products now offer "Send to CaseMap" functionality, and others will soon. The "Send to CaseMap" features in these products provide a common and simple way to cull critical passages from source material and to automatically create facts in CaseMap based on these passages.

CaseMap integrates seamlessly with a wide range of industry-leading LexisNexis® litigation support, research and practice management resources, including:

- Concordance® discovery management software (versions 8, 9 & 10)
- CourtLink®
- Concordance® FYI™
- LexisNexis® Quicklaw®

- TextMap® transcript management software
- TimeMap® timeline graphing tool
- Time Matters®
- NoteMap®

Plus, dozens of other common litigation tools and software — even Microsoft® Office products — offer "Send to CaseMap" functionality:

- Adobe® Acrobat®
- Applied Discovery®
- Binder™
- Westlaw® CaseLogistix®
- DocuMatrix®
- Hummingbird DM® 5
- iCONECTnxt®
- IPRO®
- LiveNote®

- Microsoft® Outlook® (w/ optional CaseMap DocManager)
- Microsoft® Word
- NetDocuments®
- Nexidia™
- PDF Converter Enterprise®
- Prevail
- Primafact
- Ringtail™

- Sanction
- SmartDraw®
- Summation
- TrialDirector® (versions 4 & 5)
- West Case Notebook®
- WorkSite® 8.2
- WORLDOX®
- ZyIMAGE®

The "Send to CaseMap" implementation for all of these products is virtually identical, which means that once you learn how to use "Send to CaseMap" with Adobe Acrobat, you know the basics of doing so with Concordance, Summation, and all the rest.

Bulk Send to CaseMap

These products offer "Bulk Send to CaseMap" functionality

- Concordance (versions 9 & 10)
- CourtLink
- Acrobat®
- Hummingbird DM 5

- Interwoven WorkSite
- Summation
- Time Matters (version 11)
- WORLDOX

New with CaseMap 10 –
