

Browse Sources: Find Specific Sources To Search

You don't have to select sources before searching in Lexis Advance Quicklaw, but if you want to search specific sources, you can find them two ways.

1. If you know the source name or partial name, enter it in the red search box.

- A** Select a source title to add to your search.
- B** Select a source's Table of Contents (TOC) link to browse the TOC, search the full TOC or select specific parts of the TOC to search and/or deliver.
- C** Select a source's Get Documents link to retrieve all available documents for that source. You can then set a Publication Alert to get source updates.

2. You can also search or browse source listings:

- D** Click Browse, then select Sources. Browse by jurisdiction, content category, practice area or subscription. Or click All Sources to search and browse alphabetically by title.
- E** Enter a title or partial title. Suggestions are provided as you type. Click the gray magnifying glass to search.
- F** Filter sources by content categories, jurisdictions, etc. Find what you need more quickly by selecting filters (e.g., Cases), then Court Decisions, then select one or more jurisdictions.
- G** Browse All Sources alphabetically. Use this bar first to select a letter, then add content category and jurisdiction filters.
- H** Click a source link and you can:
 - Retrieve all available documents for that source
 - Add the source to your search
 - Set up an Alert update to get new releases from that source
- I** Click the information icon to display the source description with details on content, coverage and update schedule.
