

# WHAT'S NEW

## R.7.0 Enhancements

### ENHANCEMENT TO SEARCHING FROM THE TABLE OF CONTENTS VIEW

Radio buttons now provide quick access to search options available in the Table of Contents view. While in the Table of Contents for a specific source, you can choose to search either the full text of all the documents in the source by selecting **Search All Documents in this Source** or just the headings in the Table of Contents by selecting **Table of Contents (TOC) only**.

The screenshot shows the Lexis Advance Quicklaw interface for the 'Canadian Labour Law Reporter' source. A search bar is highlighted with a red box, and a green box highlights the search options: 'Search All Documents in this source' (selected) and 'Table of Contents (TOC) only'. A green arrow points to the green box. Below the search bar is a table of contents with three entries: 'Labour Law Cases NewsTracker', 'Labour Law Cases What's New', and 'Cases'. Each entry has a star icon and a magnifying glass icon.

▶ Labour Law Cases NewsTracker	☆	🔍
▶ Labour Law Cases What's New	☆	🔍
▶ Cases	☆	🔍

## ENHANCEMENT TO SEGMENT SEARCHING

To further improve your search options, the following NEW segments were made available in our January 2017 release.

<b>Dictionaries</b>		
Defined Terms	Defined-Term	Terme-Défini
Court	Court	Tribunal
Judges	Judge	Juge
Digest Subject	Digest-Subject	Domaine-Droit
Quoted text	Quoted-text	Extrait-Texte

## IMPROVEMENTS TO TIME-OUT MESSAGING

To improve users' experience, we've enhanced the messaging that appears when a Lexis Advance Quicklaw session times out. Now, when your Lexis Advance Quicklaw session times out, a message appears that explains what happened. This message will include a link to sign back in. When you sign in again, you will return to the same page you were viewing when the session timed out.

## IMPROVED ACCESSIBILITY

We continued to make enhancements that will provide improved accessibility to Lexis Advance Quicklaw for persons with disabilities.
