## ABOUT

---

LegalTek Solutions is a company started and managed by Saimoon Bhuiyan. With over 18 years of advanced PCLaw experience, LegalTek specializes in installation and configuration, advanced data corruption fixes, network and environmental issues, and PCLaw SQL Server configuration, administration and maintenance. As a LexisNexis PCLaw Advanced Certified Partner, LegalTek Solutions is committed in helping you get the best out of your practice management solution.

## WHAT DISGUISHES LEGALTEK SOLUTIONS

---

With extensive experience as a LexisNexis second level PCLaw Systems Engineer and Team Leader, Saimoon Bhuiyan not only assists Lawfirm's in optimizing their PCLaw environments and database, but also helps other Certified Practice Management Partners with their clients' issues. He has quickly become a valuable asset and trusted partner in the PCLaw community. Very few people outside of PCLaw development understands and works with the PCLaw SQL or CTree database quite like Saimoon does. With PCLaw Version 15 migrating towards a full SQL database platform, Legaltek is more than prepared to help any lawfirm or Consultant with a successful upgrade and conversion to SQL.

Also being certified as a Microsoft Certified Systems Engineer, Saimoon can assist with Managed IT services or work with your existing IT personnel to ensure best practices are in place for optimal PCLaw performance. Additionally, LegalTek has experience with Quicklaw, Lexis Advanced QuickLaw, CaseMap, EDA/LAW PreDiscovery and Concordance.
