The screenshot shows the Lexis Advance Quicklaw interface. The top navigation bar includes 'Lexis Advance Quicklaw', 'Browse', 'English', 'Français', 'Client: -None-', 'History', and 'More'. The 'Browse' menu is open, showing a list of countries (Canada, Australia, New Zealand, United Kingdom, United States of America) and a search bar. The 'Judicial review and statutory appeal' sub-topic is selected, and its actions menu is open, showing options like 'Get documents', 'Add topic as a search filter', 'Create a topic alert', 'Review for lack or excess of jurisdiction', 'Scope of review', 'Standard of review', and 'When available'.
