

Future Mobility: Are you ready for the seismic shift?

As technology changes the way we transport people and goods, key stakeholders inevitably need to navigate new risks, alongside new opportunities. With vehicles as the next 'connected device', concerns relating to operating systems, patents, privacy, data transfer, connectivity, cybersecurity, encryption, and services proliferate dramatically, bringing an escalation in regulation, enforcement, and litigation.

Equally, with increased momentum behind efforts to wean mankind off the combustion engine and promote cleaner energies, fewer emissions and electric charging, a multitude of risks and exciting opportunities are emerging in the energy sector.

Always at the forefront of global reporting on regulatory risk, MLex™ boasts comprehensive, forensically detailed coverage of the two major trends which are shaking up transport and related industries: digital transformation and the energy revolution.

With real-time Future Mobility reporting and forward-looking analysis, MLex can help you keep track of all significant developments that may potentially impact your business and clients across the globe.

Get the complete picture

As the key trends shaping the future of mobility cut across different areas of regulation already expertly covered by our specialist journalists (data privacy and security; energy and climate; antitrust; mergers and acquisitions and more), MLex saves you research time by joining the regulatory dots across these spheres, as well as across the globe.

Build your risk strategy

With longstanding expertise in defining regulatory risk as it emerges, and a team including journalists devoted solely to Future Mobility reporting, MLex delivers exclusive insight into how businesses will be impacted by the transformations in tech and energy – often ahead of other news outlets.

Spot business opportunities

In addition to helping you to side-step risk, the MLex Future Mobility coverage allows you to identify and nurture new business opportunities in a rapidly evolving operating environment.

Explore highlights from our Future Mobility coverage

The MLex expertise behind Future Mobility

Antitrust

As a leader in antitrust news across the globe, our experts deliver exclusive, forward-looking scoops on cartels, probes into restrictive practices, policy changes and related litigation. Our deep coverage provides behind-the-scenes information you can't get anywhere else.

Data Privacy & Security

Get the insight your business and clients need to navigate constantly evolving data privacy and security laws and regulations across the globe.

Energy & Climate Change

Track major European energy and environmental policy developments, including major energy debates and negotiations, regulation of the power industry, security of energy supply, climate change, alternative energy, consumer needs and technical innovation.

Financial Crime

In addition to comprehensive coverage of anti-bribery and corruption laws, probes, and litigation, MLex closely follows and reports on financial crime within the banking industry, including anti-money laundering, insider trading, fraud and market manipulation.

Financial Services

Our EU and U.S. experts report on the regulatory bodies that set global standards as well as regional rulemaking, implementation, and enforcement in the areas of derivatives, trading and securities, investment and retail banking, asset management, payment services and credit-rating agencies.

Mergers & Acquisitions

Be the first to know of merger developments and receive unique insight from MLex M&A experts on the review process, procedural steps and court litigation resulting from approved or blocked deals.

State Aid

Advise your business and clients on aid schemes that will be compliant with the law by following MLex coverage on EU investigations and policy changes regarding support offered by EU governments to companies and sectors.

Tech & Telco

MLex closely follows changes to regulation impacting Internet platforms, global connectivity and media rights.

Trade

With a focus on the major trade centers – EU, U.S., U.K., and their trade relationships with other nations – MLex tracks global trade

About MLex

Our investigative reporters are on the ground, where you need us the most. We break news on developmental regulation from the earliest stages of industry consultation, right through enforcement and litigation from the world's most critical centers in North America, Latin America, Europe and Asia. MLex experts provide insight that isn't available elsewhere – our relationships with local sources allow you access to information before it is public. You can count on MLex for not only news and updates, but also expert analyses that explain how businesses are impacted, portfolios that show the history of a particular issue and source documents from regulatory agencies.
